

ARCHOIL AR6400-G FUEL SYSTEM CLEANER

TECH SHEET

ESSENTIAL MAINTENANCE FOR YOUR FUEL SYSTEM | FOR USE IN GASOLINE ENGINES

AR6400-G is formulated to clean gasoline engines and fuel systems. Even a brand new vehicle's performance will decline if not regularly treated with a fuel system and engine cleaner. Use AR6400-G to restore and maintain maximum performance and economy. Treat your fuel every 5,000 miles or every oil change to maintain a clean fuel system and engine.

16oz (473ml) bottle
Treats between
12-25 gallons of gasoline

FEATURES AND BENEFITS

- Optimized for gasoline engines
- Cleans fuel system and injectors
- Reduces combustion chamber deposits
- Cleans intake valves
- Increases power and fuel efficiency

CLEAN FUEL SYSTEM AND ENGINE

AR6400-G uses detergents, including a large dose of PEA, to quickly and safely remove gum, varnish and carbon from the fuel system and engine. AR6400-G will also clean carbon deposits from intake valves on manifold injected vehicles, and help to remove deposits from turbochargers and EGR valves.

ENSURE OPTIMUM POWER AND FUEL EFFICIENCY

Many of the world's automobile manufacturers including BMW, GM, Fiat Chrysler Automobiles, Honda, Toyota, Volkswagen, Mercedes-Benz and Audi, recognize that the levels of detergents required by the EPA to be present in gasoline is not high enough to maintain optimal engine performance. Removing deposits which have built up over time will restore power and fuel economy which has been degraded by deposit formation. Regular use of AR6400-G will help maintain optimum fuel economy and power.

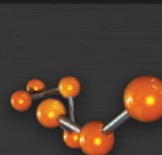

TREAT RATE

One bottle of AR6400-G treats between 12 and 25 gallons of fuel.
Use one bottle per 12 gallons of fuel for deep cleaning.
