

ARCHOIL AR8100 HEAVY DUTY GREASE

TECH SHEET

EXTREME PRESSURE PROTECTION

AR8100 Heavy Duty Synthetic Grease is a high performance extreme pressure (EP) grease developed with a biodegradable non-toxic PAO base stock and using fumed silica as a thickener. AR8100 is designed for extreme pressure and extreme temperature applications and is formulated to provide anti wear, extreme pressure and corrosion protection in trucks, automobiles, heavy equipment, locomotives, marine environments and other extreme environments.

14oz tube

FEATURES AND BENEFITS

- Forms protective, friction-reducing film
- Extreme pressure/anti-wear protection
- Long lasting corrosion protection
- Extremely low water washout rate (0.50%)
- Long lasting for extended greasing intervals
- High dropping point (>550F)
- Low freezing point (-105F)
- NLGI Grade 2

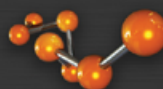

APPLICATIONS

Applications include 'O' rings, gaskets, bearings, bushings, metal gears (not suitable for plastic gears), universal joints, electric motor bearings, fifth wheels, wheel bearings, pump bearings, heavy equipment, commercial fleet, railroad, racing, industrial gearboxes, marine, wire rope, threads, etc. Perfect for heavy duty chassis lubrication.
