$$

Use the pencil to draw a line marking longest parts of your foot; at your longest toe and at your heel (Length)

Use the pencil to mark the widest ends of your foot (width) as seem on the Le Ruux Paper.

Skep Jthree:
Finally, now take off your foot from the paper. Use a ruler to measure from your toe to your heel (length), and do the same for the width. Write done this measurement and submit with your order.

Now do this all over again for your other foot and record the dimensions.
