1 FIT AND SECURE

1.1

Use the Clear Protective Strip (Item 1) to protect the paint work of the vehicle, where the Rubber Trim may make contact with the roof.

Apply Denatured Alcohol to make sure the roof is clean before applying.

Align the protective strip where the wind fairing rubber strip will be touching the roof.

Remove the backing tape and apply the strip. Use a soft, clean cloth to apply pressure.

Refit the Wind Fairing and fully tighten.

3 WIND FAIRING CARE

Clean dust and debris build-up between the Rubber Trim and Clear Protection Strip at regular intervals.

4 FINISH

Congratulations! You did it. Take a step back and admire your work!
