FOOT RAIL

JEEP WRANGLER JKU 4 DOOR (2007-CURRENT)
SLIMLINE II EXTREME ROOF RACK KIT

ENG

KRJW020T

START HERE! READ ME FIRST

Don't be a hero and muscle through this without first reading these fitting instructions! Improper installation of this gear may void certain aspects of your warranty.

Before you begin, take a moment and open all your Front Runner rack kit boxes and gather the assembly instructions for the various components.

A complete kit will contain:

1. A Front Runner Mounting System specific to your vehicle
2. A Front Runner Rack Tray or Load Bar Slats

This document will guide you through the assembly of the mounting system and assist you in fitting the roof rack tray or load bars to your specific vehicle.

Please refer to the next page for a list of all the components, quantities and tools required.

IMPORTANT WARNING! ⚠

IT IS CRITICAL THAT ALL FRONT RUNNER PRODUCTS BE PROPERLY AND SECURELY ASSEMBLED AND ATTACHED TO YOUR VEHICLE. IMPROPER ATTACHMENT COULD RESULT IN AN AUTOMOBILE ACCIDENT, AND COULD CAUSE SERIOUS BODILY INJURY OR DEATH. YOU ARE RESPONSIBLE FOR ASSEMBLING AND SECURING ALL FRONT RUNNER PRODUCTS TO YOUR VEHICLE. CHECKING THE ATTACHMENTS PRIOR TO USE, AND PERIODICALLY INSPECTING THE PRODUCTS FOR ADJUSTMENT, WEAR AND DAMAGE. THEREFORE YOU MUST READ AND UNDERSTAND ALL OF THE INSTRUCTIONS AND PRECAUTIONS SUPPLIED WITH YOUR FRONT RUNNER PRODUCT PRIOR TO INSTALLATION OR USE. IF YOU DO NOT UNDERSTAND ALL OF THE INSTRUCTIONS AND CAUTIONS, OR IF YOU HAVE NO MECHANICAL EXPERIENCE AND ARE NOT THOROUGHLY FAMILIAR WITH THE INSTALLATION PROCEDURES, YOU SHOULD HAVE THE PRODUCT INSTALLED BY A PROFESSIONAL INSTALLER OR OTHER QUALIFIED PERSONNEL.

Here is what you are looking at for FAJK002

IN THE BOX

1	2 X	Inner Roll Bar Clamp
2	2 X	Outer Roll Bar Clamp
3	28 X	M6 x 12 x 1SS Flat Washer
4	16 X	Foam Seal Washer
5	16 X	Aluminum Spacer
6	16 X	M6 x 30 Hex Bolt
7	20 X	M6 Nyloc Nut
8	8 X	M6 x 20 Hex Bolt
9	20 X	M6 Nut Cap
10	16 X	M6 x 19 x 1SS Flat Washer
11	2 X	Rear Support Bracket - 1LH + 1RH
12	2 X	M8 x 75 Hex Bolt
13	2 X	M8 Large Washer
14	2 X	Middle Support Bracket - 1LH + 1RH
15	16 X	Sealing Plug Assembly

IN THE BOX

19	14 X	M8 X 16 Hex Bolt
20	2 X	Foot Rail 1LH + 1RH
21	14 X	M8 x 16 x 1.6SS Flat Washer
22	14 X	M8 Nyloc Nut

FIGURE 1.3

2

PREP FOR INSTALLATION OF REAR SUPPORT ARMS (FAJK002)

2.1

Loosen velcro, unzip and remove the padding covering the roll bars.
Remove the wiring harness and plastic clip from the roll bar.

2.2

Locate the two threaded holes on the underside of the roll bar and fasten the two halves of the Roll Bar Clamps (Items 1 & 2) to the roll bar using items 3 & 8. Place the outer half of the clamp first.

2.3

Loosely attach the Rear Support Arms (item 11) to the outside of the Roll Bar Clamps using items 3, 7 & 8. Make sure the foot faces to the inside of the vehicle and the contours of the foot match the contours of the roof as shown.
Mark the position of the four holes in the foot on the roof.
Once the holes have been marked remove the Rear Support Arms.
Pilot drill the marked holes using a 6mm drill bit.

3

PREP AND INSTALL MIDDLE SUPPORT ARMS (FAJK006)

3.1

Locate the Foot Rail in position by lining up the holes in the bracket with the holes drilled in Step 2.3.

Place a M6 x 30 Hex Bolt (item 6) into each hole to keep its location.

3.2

Using a measuring tape and a rib in the roof as a reference, adjust the front of the bracket so that the entire length of the bracket is parallel with your reference rib.

3.3

Once you are happy with your measurements and alignment, mark the four holes in the foot of the Foot Rail onto the roof.

Remove the Foot Rail.

From outside the vehicle, using your 6mm drill bit, drill the four pilot holes through the marks you just made.

Repeat Step 2.1 to 3.3 for the opposite side.

3.4

TIP - It is easier to do the next step if you remove the roof.

Change from the 6mm drill bit to a 22mm hole saw. From the outside of the vehicle drill all the 6mm holes (16 in total) out to 22mm. Once again, let the drill do the work. You do not want to scratch or damage your vehicle's roof. You may wish to have a friend inside the vehicle with a vacuum cleaner underneath where you are drilling to catch all the dust and keep your vehicle clean.

3.5

Pull back the padding around the roll bar above the rear seats and insert Items 12 & 13 (from FAJK002 box) through the hole as shown.

3.6

From the inside of the vehicle, in the same position as where you just inserted the bolt in Step 3.5, push the Middle Support Bracket (Item 14) through the hole in the roll bar padding and loosely fasten it to the roll bar.

Please note that there is a left hand and right hand bracket. The arrow on the bracket must point to the rear of the vehicle.

4

INSTALLATION OF REAR SUPPORT ARMS

4.1

Recycle icon: Refit and fasten the Rear Support Arms as in Step 2.3

Warning icon: **NOTE:** Use the worm slots to adjust the height of the rear support brackets. This will be important to create a weatherproof Seal.

5

INSTALLATION OF FRONT SUPPORT ARMS (FAJK003)

5.1

Recycle icon: Using a T40 Torx Wrench, remove the six bolts holding the Window Corner Plates in place. Be careful not to let the plate fall when removing the last bolt as this may result in damage to the paintwork of the part or your vehicle.

5.2

Recycle icon: Remove the paper backing from the rubber strips supplied and apply five pieces to the inside of each Front Support Arm as shown.

Fasten the Support Arms (Item 18) over the window corner plates using the original bolts.

6

PREP FOR RACK INSTALL (FAJK002)

6.1

Clean the area around all the 22mm holes drilled in the roof with a rag and methylated spirits/denatured alcohol.

Insert the Aluminum Spacers (Item 5) into the Foam Washer (Item 4). Remove the paper backing from the Foam washer to expose the adhesive.

Insert the washer/spacer combination, adhesive side down, into the 22mm holes so that the spacer comes to rest on the Rear Support Brackets underneath.

Firmly press the foam washer all the way around securing it to the roof.

6.2

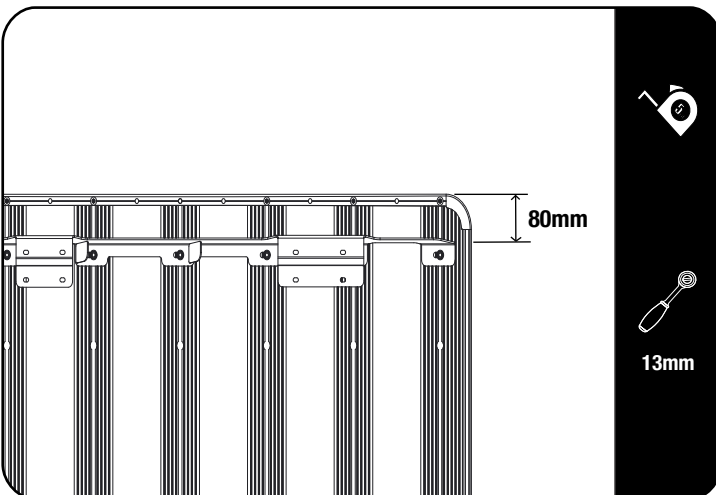

If not already assembled, assemble your Tray as per the Universal Tray Assembly Instructions (Document RRTUNI)

NOTE: Before fitting the wind deflector, insert the M8 x 20 Hex Bolts (item 15 from FAJK003 box) into the first slat (Combined Slat) using the machined slot. Slide a bolt to each of the outer corners.

6.3

After fitting the wind deflectors, the tray should still be upside down, loosely mount the Foot Rail (from FAJK006 box) to the Tray using items 19, 21 & 22. As before use the machined slots to insert the hex bolts into the Slat. The Foot Rail should be mounted at the opposite end of the Tray to the wind deflector.

The rear of the Foot Rail must mount onto the very last Slat(Combined Slat) and approximately 80mm in from the outer edge of the side of the Tray. Do not tighten the bolts yet.

7

MOUNT YOUR TRAY

7.1

With the help of a friend, flip the Tray end over end so that it is in the upright position. (The Tray is flipped end over end so that bolts and brackets do not slide left and right).

With one of you on either side of the Tray, lift the Tray and walk it into position above the vehicle, approaching from either the front or the rear of the vehicle.

7.2

Line up the Front Support Arms with the two Hex Bolts either side of the wind deflector and hand tighten the front of the Tray to the arms using Items 16 & 17 (from FAJK003 box).

7.3

The Foot Rail should still be loose enough to move. Line the brackets up with the holes on the roof and fasten them into position using Items 3, 6, 7 & 10 (from FAJK002 box). Centre the tray from left to right. Use a tape measure to double check. Once you are happy that the Tray is in the correct position, fasten all the nuts and bolts, both inside and outside of the vehicle on all brackets that were installed.

Push the Plastic Nut Caps (Item 9 from FAJK002 box) provided over all the exposed bolts and close up all the roll bar padding.

8

REMOVING YOUR RACK

8.1

Should you wish to remove your rack, you will need to plug the holes you drilled in the roof (Step 3.4), using the supplied Sealing Plug Assemblies.

Remove the Tray, Front Uprights and the Foot Rail, by reversing the installation procedure. Leave the Foam Washer and the Aluminum Spacers in place. Screw in the Sealing Plugs reusing the M6 Nyloc Nuts and Washers that held the Foot Rail in position.

9

TAKE A TRIP

9.1 After your first adventure, check that all nuts, bolts, screws and fittings are tight. Re-tighten where needed. You'll find a small amount of settling has happened.

Go on many more adventures, periodically checking all nuts, bolts, screws and fittings.

Front Runner can not recommend a maximum load carrying capacity. Please refer to your vehicle manufacturer's recommendations

10

COMPLETION

10.1

Congratulations. You did it. Take a step back and admire your work!
