

How do you brew?

Recommended brewing recipe for trade

In terms of dialling in the grinder to our coffee, we recommend starting with a 1:2.5 ratio e.g 17g dose: 42.5g liquid in the cup brewed in 22 - 24 seconds. Adjust to taste.

For cafetiere & filter: 15g medium ground coffee per 250ml cup of boiled water for ~4 minutes
