

# THE KIND LED BAR LIGHT

Kind LED Bar Lights are the industry's best-selling, complete full spectrum bar lights. The first choice for professional growers worldwide, these supplemental lights are the ideal option for providing greenhouses and/or high light use plants the additional intensity they require, or function perfectly as primary lighting for average light use plants. These full spectrum vegetative bar lights feature both the macro and micro (including UV & IR) spectra needed to meet the lighting demands of any vegetative plant.

These low profile, premium bar lights incorporate the same great award-winning design features that have become synonymous with Kind LED Grow Lights:

## ● KINDEST YIELDS

*Optimized Driving Current Increases Diode Efficiency and Output, Resulting in a Brighter, Higher Yielding Footprint*

## ● KINDEST SPECTRUM

*Proprietary 12 Band Complete "Perfect Spectrum" Maximizes Growth Rate & Production of Developing Plants*

## ● KINDEST INTENSITY

*Secondary Optical Lens Magnifies PAR and Increases Canopy Penetration By Up to 200%*

## ● KINDEST QUALITY

*Sturdy Craftsmanship & Durable Design, Sealed to IP 65 Standard, Offering Complete Resistant to Dust & Water*

## RECOMMENDED SPACING

Kind LED Vegetative Bar Lights come with two lighting configurations that may be paired or used individually based on the application: Macro Spectra & Micro Spectra.

## KIND LED BAR LIGHTS ARE THE BEST LIGHTING OPTION AVAILABLE FOR:

- Outside/Inside edge lighting in grow tents to aid in filling out large plants
- Indoor and greenhouse supplemental lighting applications
- Replacing T-5 fluorescent fixtures in any application (50% less electricity & up to 2x PAR)
- Multilevel and/or vertical growing applications
