## CULTURE & CENTRIFUGE TUBES

- **Round Bottom Culture Tubes**
- **Conical Centrifuge Tubes**
- **High Clarity Polymers**
- **Printed Graduation & Marking Spot**
- **Sterile; RNase & DNase Free**

### Sterile Culture Tubes

These disposable sterile tubes are made of high quality polypropylene (PP) that will withstand temperatures from -190° to +120°C. They are also available in crystal clear polystyrene (PS) with a more limited range of 0° to 70°C. Caps are made of polyethylene (PE) and have the popular two position design (up/ loose for aerobic work and down/ sealed for anaerobic cultures). Polystyrene tubes may be centrifuged at up to 2000xg. Polypropylene tubes withstand higher forces, up to 4000xg.

### Sterile Centrifuge Tubes

Conical 15ml and 50ml centrifuge tubes are made of premium polypropylene for clarity and centrifugal strength. Tubes and caps may be frozen at temperatures as low as -86°C. The maximum centrifugal force is 12,000xg for the 15ml tubes and 15,000xg for the 50 ml tubes\*. Caps have a flat top surface for easy marking and labeling. Cat. No. C2605 features a "skirted" bottom that allows the tube to stand upright without a tube rack.

\*Refers to liquids w/ a specific gravity of 1.0, using appropriate rotors, cushions & adapters.
