

NITRO COFFEE EQUIPMENT CLEANING

BI-WEEKLY: The faucet tip should be rinsed every 3-4 days. Simply unscrew and rinse under water. Be careful not to lose the restrictor plate that rests inside the faucet.

WEEKLY: Wash the lines with COLD PRO CLEANER. Fill a keg $\frac{3}{4}$ full of tepid water and 1/2 scoop of COLD PRO CLEANER. Assemble Nitro set up as usual (just replacing a keg of coffee with water and Cold Pro Cleaning solution) Run the solution through the lines and faucet (as though you are pouring your nitro beverage) run solution through the lines and faucet until the keg is empty.

Thoroughly rinse the keg of the Cold Pro Cleaning solution residue until it is fully clear and rinsed.

Fill keg full of clear tepid water.

Hook up keg as usual.

Run clean water through the lines and faucet until the keg is empty.

Look to see if there is any Cold Pro Solution residue in the lines or faucet.

Fill another keg with clean water and run through faucet and lines if necessary.
