

CASE REFRESH

WHY CHOOSE TO RESURFACE

Cost Savings:

- Refinishing is more cost effective than buying new.
- Savings can be especially significant for larger stores or chains that have multiple units.

Environmental Concerns:

- Refinishing is eco-friendly, extending the life of cases and reducing waste.

Reduced Disruptions:

- Installing new units can cause significant disruptions, such as the need for reorganization, potential closures, or restricted customer areas.
- Refinishing typically involves less downtime and fewer disturbances to daily store operations.

Consistency:

- Maintaining a uniform or consistent look and feel throughout the store.
