

Assembly Instructions

Advent Calendar (A1010J)

1. Cut four tree calendar shapes. Cut four tree backing shapes.
2. Adhere tree backing pieces to tree shapes, being careful not to glue the doors shut.
3. Fold each tree section along perforation. Adhere sections together so that you have four sections and the tree is able to stand on its own.
4. Cut four gift box shapes as the tree base.
5. Fold the gift boxes in half along the perforation.
6. Place adhesive along the two outer perforated tabs of the gift box. Then fold the perforated tabs in and adhere to the four bottom sections of the tree.
7. Press small holiday stickers in place under flaps. Write or place sticker numbers from 1 to 24 on the flap covers.

Decoration Ideas

- Lay different types or multiple colors of paper down and cut the gift boxes out. You can then cut the bows from the top of the gifts and adhere them onto your package.
- Add a festive ribbon to the top.
- Another tree top idea is to cut two yellow stars and glue them together with a tooth pick in between. Then insert the toothpick into the top of the tree between the layers.

Helpful Tip

- Allow each student to make his or her own advent tree and hide various items behind the openings. Students can take the trees home and share them with their families, using each uncovered item as a prompt for a topic of conversation during family time.
