Smart Scale™

The Brewista® Smart Scale™ has a water repellent nano-coating to protect the scale from the harsh wet environment of an espresso machine drip tray or common spills on a kitchen counter. Six different modes allow the user to choose if, how and when it automatically tares and times for making espresso, pour-over coffee, or for use as a standard scale. Two protective covers serve dual purpose as bean trays and keep the beam safe when packed in a drawer or backpack. A programmable auto-off function conserves the two included AAA batteries. With a hefty 2000 gram capacity, it remains accurate to within 0.1 grams for precise control. The non-slip rubberized coating makes it easy to hold even when hands are wet. Inspired by competitive baristas, the Smart Scale™ is perfect for any method of coffee preparation.

Personalization Available:

To have a product laser etched with your company logo, please provide a high resolution (at least 300 DPI or preferably a vector format) image of the logo to Brewista. A one-time set up fee will be charged to process your logo. Once it's in our system it can be re-sized to be placed on any of the products we personalize, with no further logo processing fee.

The personalization cost per item varies depending upon the quantity ordered and the item type. Personalization is not available for every product we sell. Brewista will only personalize items with official company logos or for the purpose of promoting corporate business. We only personalize items purchased from Brewista.

Please contact us at sales@mybrewista.com for availability and a price quote.
