### Brewista® Ratio Scale

Brewista's innovative Ratio Scale allows users to make perfect pour over coffee by pacing the amount of water to pour. The scale automatically calculates the water needed based on the amount of coffee grounds used and chosen ratio. Dual timing bars display the actual and desired pour rates. Matching the timing bars achieves the recommended 2½ minute pour time. The Ratio Scale makes a perfect training tool for baristas and coffee lovers alike that want to get their pour over coffee dialed in. It features automatic and fully manual modes, and the water to grounds ratios are adjustable.

The Ratio Scale takes care of the math so you can take care of the customers!

### Personalization Available:

To have a product laser etched with your company logo, please provide a high resolution (at least 300 DPI or preferably a vector format) image of the logo to Brewista. A one-time set up fee will be charged to process your logo. Once it's in our system it can be re-sized to be placed on any of the products we personalize, with no further logo processing fee.

The personalization cost per item varies depending upon the quantity ordered and the item type. Personalization is not available for every product we sell. Brewista will only personalize items with official company logos or for the purpose of promoting corporate business. We only personalize items purchased from Brewista.

Please contact us at [sales@mybrewista.com](mailto:sales@mybrewista.com) for availability and a price quote.
