QUICK START GUIDE

Start Here

• Features

- Perfect for pour over coffee
- Double wall tempered heat resistant glass
- Non-slip silicone base
- Cool to the touch
- Flat bottom fits standard basket-style filters
- Fits perfectly onto Brewista 360 ml and 600 ml glass servers
- Dishwasher safe

1

To prepare perfect pour over coffee with the Smart Dripper™, Brewista® recommends using the Brewista Smart Scale™ and a Brewista Smart Pour™ Gooseneck Kettle for ultimate control.

- Bring enough water to just below a boil in order to brew the coffee and preheat the Smart Dripper™ as well as your mug or server.

2

- Place a basket-style paper filter (we recommend Melitta brand filters) into the Smart Dripper™.
- Then place the Smart Dripper™ on top of your mug or server, and pour the heated water into the center.
- Allow the water to drain.

3

- Dispose of the preheat water.
- Replace the Smart Dripper™ on top of your mug or server, then place them on a scale.

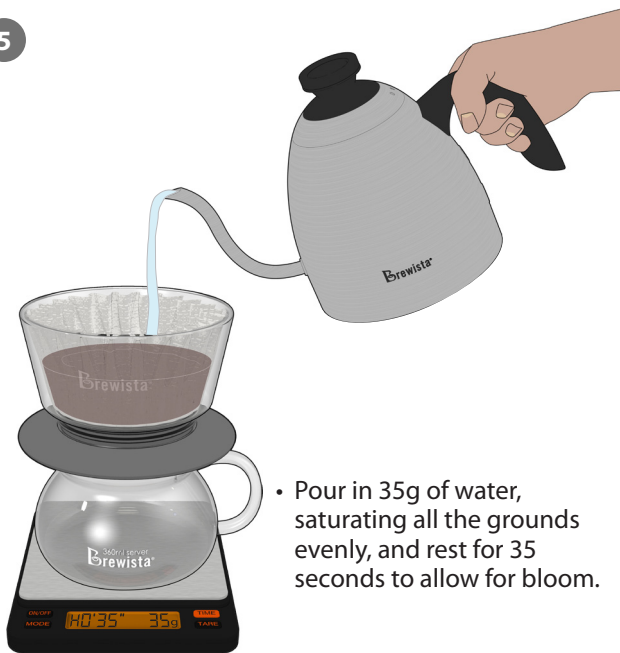

Manual modes on the Brewista® Smart Scale™ are ideal for making pour over coffee.

4

- Add 20 grams of medium-ground coffee to the filter.

5

- Pour in 35g of water, saturating all the grounds evenly, and rest for 35 seconds to allow for bloom.

6

- After the bloom, pour up to 115g of additional water in concentric circles up to the 1:00 mark.

7

- When the slurry has drained about a centimeter, slowly pour in 50g pulses every 30 seconds until you reach 300g total water weight around 2:30.

8

- Allow all coffee to drain (by approximately 3 minutes, 30 seconds) and remove the Smart Dripper™

9

- Sip and enjoy!
