1. Set the base on a flat, steady surface and plug cord into a grounded wall outlet. (If your kettle has a removable power cord, attach the female end of the power cord to the base first.)
2. Lift off the lid and fill kettle with cold water. IMPORTANT! Do not fill above the “max” fill line (1.2L).
3. Return kettle to the base.

**Features**
- Auto-start function heats your water to your chosen temperature at your selected time
- Displays temperature in Fahrenheit or Celsius
- Displays actual water temperature in kettle even when powered off
- Includes preset temperatures for popular hot beverages
- Retains last temperature settings when powered off or unplugged
- Allows user to set and hold water temperature for up to one hour
- Durable 300 Series food grade stainless steel
- Count-up timer feature
- Detachable power cord (in markets outside of North America)

**What’s in the box?**
- 1.2 Liter Gooseneck Spout Digital Kettle
- Cafetto™ Descaler Base
- Quick Start Guide
- Instructional video

**Setting Up the Kettle**
- Fill the kettle to the Max fill line (1.2L) (marked inside of kettle) with cold water.
- Replace the lid with holes facing away from the handle.
- Press the ON/OFF button to start boiling automatically.
- Bring water to a boil, then empty the kettle.
- Allow the appliance to cool down for 1 minute.
- Repeat twice before initial use.

**First Time Use**
- Press the °F / °C button to choose either Fahrenheit or Celsius.
- Press the TEMPERATURE SETTING button to choose a preset temperature.
- Press the [+] button to increase the temperature by one degree.
- Press the [-] button to decrease the temperature by one degree.
- The temperature displayed on the screen will be stored after three (3) seconds.
- Once the temperature is set, it will be stored in memory and will be recalled the next time the kettle is turned on.
- When the set temperature is reached, three audible beeps are emitted.

**WARNING:** Never set the temperature above the boiling point. Refer to the “High Altitude Users” section in the owner’s manual to determine the boiling temperature for your altitude.

**Setting the Temperature**
- Refer to owner’s manual for detailed temperature setting instructions.

**Brushed stainless steel finish**
- Easy grip handle for excellent pour control
- Cord wrap (in base)
- (Removable power cord in markets outside of North America)
**Setting the Current Time**

(Refer to owner’s manual for detailed setting instructions.)

- Plug the power cord into the wall outlet. The display will show “time am 12:00”.
- Press the [+] button to change the hour.
- Press the [-] button to change the minute.

**Keep Warm Function**

(Refer to owner’s manual for detailed setting instructions.)

- Press the KEEP WARM button. The set temperature will be maintained for one hour.
- If the kettle is removed from the base, the Keep Warm feature will deactivate.
- To resume the Keep Warm feature, return kettle to base and press the KEEP WARM button.
- If the Keep Warm feature is not active, the kettle will reach the set temperature and shut off.

**Auto-Start Function**

(Refer to owner’s manual for detailed setting instructions.)

- Remove the kettle from the base.
- The LCD will display “0:00”.
- Press the [+] button to start the count-up timer.
- The maximum count-up time is 7 minutes.
- Return the kettle to the base then lift it off again to reset the timer to zero.

**Count-Up Timer Feature**

- Remove the kettle from the base.
- The LCD will display “0:00”.
- Press the [-] button to start the count-up timer.
- The maximum count-up time is 7 minutes.
- Return the kettle to the base then lift it off again to reset the timer to zero.

**Washing Instructions**

- Remove the kettle from the base.
- Clean the outside of the base and the kettle with a damp, soft cloth or sponge. A bottle brush may be used to clean the interior of the kettle.
- Clean the inside of the kettle with dish detergent and rinse thoroughly with water.
- Do not use abrasive cleaners.
- After cleaning, dry the kettle and the base thoroughly.

**Warning:**

Never immerse the kettle or the base in water or other liquids.

**Descaling**

- When mineral scale builds up in the kettle, it can affect temperature consistency and slow down heating time.
- To ensure optimum performance, Brewista recommends descaling the kettle when mineral build-up is visible inside the kettle.

Note:

Vinegar may not effectively descale the kettle and can be difficult to thoroughly rinse. Vinegar may also leave behind an odor that could affect future use.

Brewista recommends using Cafetto™ Descaler.

How to use Cafetto™ Descaler:

- Mix 1 packet Cafetto™ Descaler with 40 oz. of lukewarm water.
- Pour the solution into the kettle.
- Bring the solution to a boil.
- Let the vessel cool for 15 minutes, then discard the solution.
- Rinse thoroughly with fresh water.

**Auto-Start Feature**

(Refer to owner’s manual for detailed setting instructions.)

- Plug the power cord into the wall outlet. The display will show “time am 12:00”.
- Press the [+] button to change the hour.
- Press the [-] button to change the minute.

**Setting the Current Time**

(Refer to owner’s manual for detailed setting instructions.)

- While the Auto-start time is flashing:
- Press the [+] button to increase the hour and the [-] button to increase the minute of the Auto-start time.
- After a few seconds of inactivity, the current time will be stored, and the LCD will flash the Auto-start time.

**Count-Up Timer Feature**

- While the Auto-start time is flashing:
- Press the [+] button to increase the hour and the [-] button to increase the minute of the Auto-start time.
- After a few seconds of inactivity, the current time will be stored, and the LCD will flash the Auto-start time.

**Setting the Current Time**

(Refer to owner’s manual for detailed setting instructions.)

- While the Auto-start time is flashing:
- Press the [+] button to increase the hour and the [-] button to increase the minute of the Auto-start time.
- After a few seconds of inactivity, the current time will be stored, and the LCD will flash the Auto-start time.

**Setting the Current Time**

(Refer to owner’s manual for detailed setting instructions.)

- While the Auto-start time is flashing:
- Press the [+] button to increase the hour and the [-] button to increase the minute of the Auto-start time.
- After a few seconds of inactivity, the current time will be stored, and the LCD will flash the Auto-start time.

**Setting the Current Time**
