

Linus and Primer

If the surface is highly absorbent, such as raw plaster, woven material etc., you can pre-treat it with Primer. Primer reduces the risk of water, soot or nicotine penetration. 1-3 coats depending on the surface. Drying time 1-2 hours.

Linus Wall Paint painted on top of plastic paint. Heat resistant!

Linus for stencilling

- Linus Wall Paint that has not been thinned or that has chalk added is excellent for stencilling.

Fill and paint with Linus Wall Paint. Use a yarn roller or brush. Use a wide spackle knife or roller with Linus filler for skim coating (see page 19).
