Special requests, unique solutions

CUSTOM-MADE

From idea to customisation

www.altrex.com

Relax. It's an Altrex.

For more than 65 years Altrex has been a brand which guarantees safety, responsibility and innovation: a global actor with a leading position in many markets. A position based on quality, knowledge, experience and especially innovation. Choosing Altrex is choosing safety. Altrex develops and manufactures high-quality products for both professional users and DIY users. High-quality products designed to help the user with working safely at great heights. The right product for every task! And that's why: **Relax. It's an Altrex.**

Modern production and logistics facilities

Altrex has a factory with sophisticated, state-of-the-art production facilities, such as fully automated welding robots. As a specialist in aluminium welding, Altrex is able to realise a consistent, high-level quality in welding, which is guaranteed through our ISO-9001 certification.

The quality of products is essential in order to work safely at height. Another reason to choose Altrex. The Altrex brand stands for quality of products and quality in service.

On a daily basis, the products are distributed all over the world from the modern Altrex logistics centre.

Complete innovative range access equipment.

Altrex offers a complete and innovative range of access equipment. No matter if it concerns rolling towers, folding towers, scaffold systems, suspended platforms, ladders, folding ladders or stepladders. A complete range, with the quality, service, durability and guarantee you can expect from an A-brand supplier. Products which are developed by devoted people with knowledge and experience. Altrex people who know what the user needs to be able to work at height safely and comfortably. Also for special situations that require custom-made solutions.

Training and education.

Altrex has its own training and education centre in The Netherlands, where product training and (safety) education are offered.

Altrex Specials.

In certain situations, custom-made/special products are required. In these situations Altrex also offers a solution and is the right choice. Altrex has a specialised department for customer solutions, where engineering and manufacturing are performed by our specialists who have the required professional knowledge and expertise.

They personally advise customers about the best and safest solutions. No matter if it concerns access solutions for a football stadium, silo access systems or climbing towers, Altrex is the right choice.

Altrex is the right partner
for every access solution.

Altrex most innovative welding line.

Altrex builds for the future. Which is why we have opted for tomorrow's technology. It has now also become a part of our production line. We are making an innovative and technical leap with an entirely new welding line.

We will gladly take you along during the further progress of what is for us our biggest project. We tell you more about our innovative techniques, people who contemplate them and our products which make us so typically Altrex, through our blogs on

www.altrex.com/innovation/en

Inspection and Repair

Within the Netherlands, Altrex offers Inspection and Repair services at the factory and/or on site.

Specific and special: customisation is the solution

Thinking in possibilities. It is the best way to create a solution for each challenge. Just when your project or process asks for just that little bit extra. Something new or innovative. Then we search for the best solution together. Because it is there. That is our experience.

From idea to customisation

A ladder of a special size, a movable maintenance platform or an evacuation stairway that seamlessly connects to the facade. Your request is our challenge. Expert engineers are ready, professional welders are prepared. Everything is possible, because at Altrex, custom work knows no limits. Beyond any standard: we make it. Specific and special.

Special requests, unique solutions

Asking the question is the key to a climbing solution that fits 100%. Look here for a number of custom projects for a wide variety of clients. Every one of them a success story, each of which started with a request.

Real custom work starts at contact with the Altrex specialist

Are you also facing a challenge?

Then custom-made also offers you an outcome. Our specialists will be pleased to help you on your way to the best solution.

So please contact us.
