AirFit™ N30i

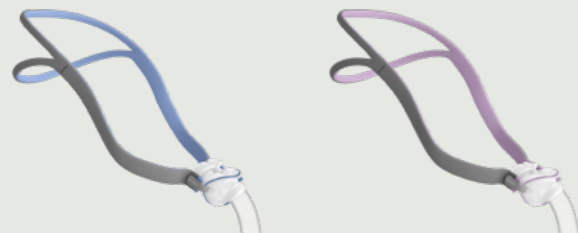

Nasal cradle mask

Freedom to sleep in any position

AirFit N30i features a top-of-the-head tube design and nasal cradle cushion that sits comfortably under the nose, so you can sleep in any position, including your side or stomach.

- No front-end tube means the mask stays out of sight and out of the way, so you can sleep closer to your bed partner
- Discreet curved cradle cushion is designed to provide a comfortable, stable seal that is less obtrusive
- Self-adjusting SpringFit frame is quick to fit and stays comfortably in place all night*
- No coverage over the nasal bridge means you can wear your glasses comfortably to read or watch TV

*ResMed external 7 days clinical study of existing 24 ResMed and non-ResMed patients, conducted between 21/02/2018 - 12/03/2018. Data on file: ID A4320645.

AirFit™ 20 series

The right fit for you

Universal seal performance

At ResMed we believe that performance is non-negotiable. A mask should seal firmly but comfortably, no matter how you wear it. And it should not be a struggle to find a model that suits you. That's why we developed the AirFit™ 20 series of masks with InfinitySeal™ cushion technology. It's designed to fit a wide range of face shapes, and be easy to fit the first time and every time.

Every face is different. That's why our innovative silicone cushion adapts to your unique facial contours to deliver a secure and comfortable fit, regardless of your face shape and size.

Made to accommodate different fitting techniques and movement during therapy, the AirFit 20 masks are designed to perform well however you wear it.
