

Ford Transit Gear Loft

I understand the design intent for this product is as follows:

- only works with Ford Transit high roof vans (2015 +)
- must have the factory visor shelf and grab handles
- is for lightweight storage - built to store 5lbs on each side (right and left) and 10lbs total (use it for window coverings, bedding, jackets, etc - not softballs, tools, 64 oz water bottles)
- supports light weight items while the vehicle is parked and, for safety, is not to be used while the vehicle is in motion
- not designed to fit with additional accessories at the overhead area
- may not be compatible in other vans with upper cabinets or bulkheads immediately behind the driver's seat (contact us first for spacing)

I have watched the [install video](#) and the overhead area in my van looks like the van in the video. I understand that it is my responsibility to not overload the Gear Loft. I will not stow items that will cause injury if they do fall from the loft.
