

## Gear Loft

I understand the design intent for this product is as follows:

- only works with Mercedes Sprinter high roof NCV1 ('07-'18) and VS30 (2019+)
- is for lightweight storage - built to store 5lbs on each side (right and left) and 10lbs total (use it for jackets, sleeping bags, laundry - not softballs, tools, 64 oz water bottles)
- supports light weight items while the vehicle is parked and, for safety, is not to be used while the vehicle is in motion
- fits with the standard visor, grab handles, and coat hooks
- not designed to fit with additional accessories at the overhead area
- does not work in the Revel or may not be compatible in other vans with upper cabinets or bulkheads immediately behind the driver's seat

I have watched the install video and the overhead area in my van looks like the van in the video. I understand that it is my responsibility to not overload the Gear Loft. I will not stow items that will cause injury if they do fall from the loft.
