

HOW IT WORKS

Your customer
presses the bttin®

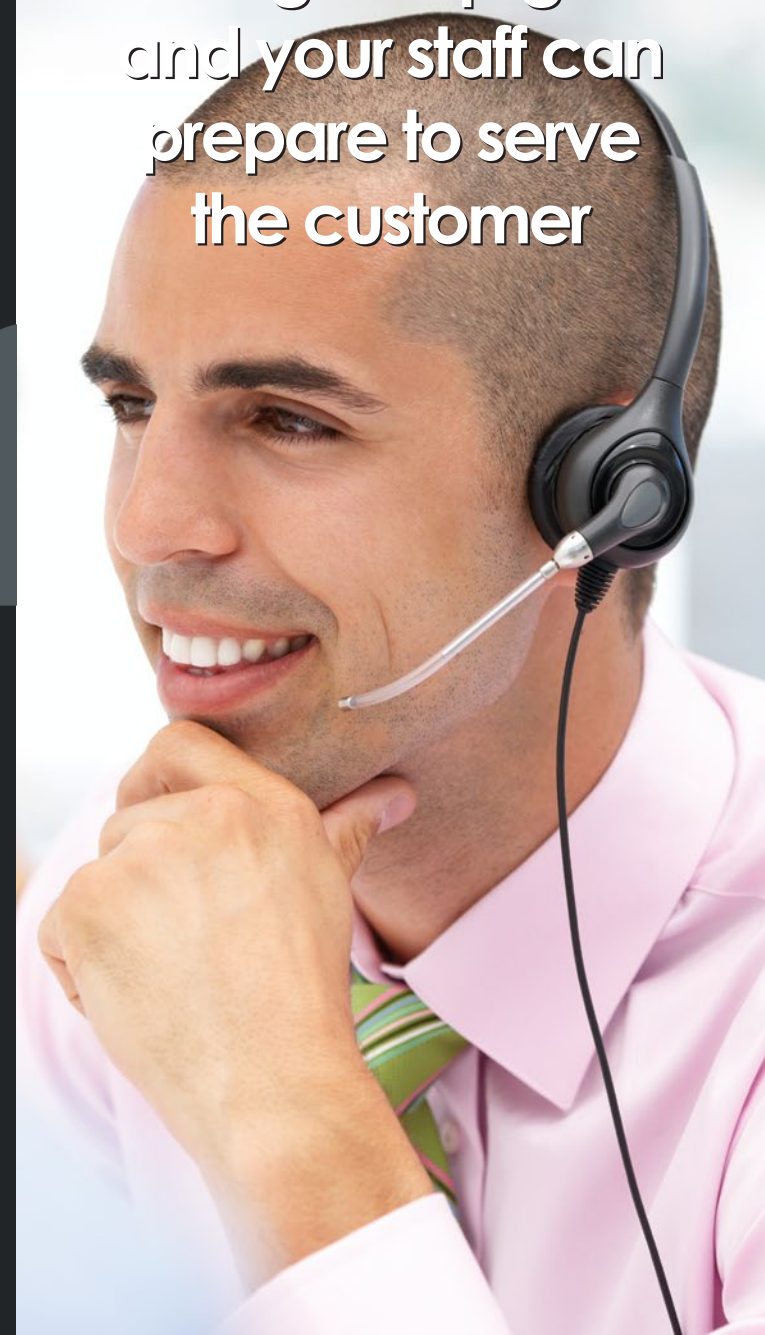

Our bt.tn® service
creates a callback
request

Your cloud

bttin® lights up green
and your staff can
prepare to serve
the customer

Improve customer
experience in...

- Call centers
- Financial services
- Insurance services
- Expert services
- Tech support

1st Class Service

Nobody likes queuing on the phone. Give your customers the ultimate VIP treatment and let them push a btttn to request a callback.

Your staff can review the customer's information and transaction history to prepare for any questions before calling back.

It's perfect for banking, insurance, tech support and all other advisory services, who want to maintain a connection with their customers.

Because superb customer service is an asset, not a cost.

btttns connect via mobile data or SIGFOX and run on batteries or USB chargers. They are available in two sizes: btttn (Ø 100 mm) and btttn Mini (Ø 69 mm).

Benefits

- **More sales & happier customers:** Just press the btttn to get service.
- **Maximal brand presence:** Nothing yells "world class service" like a btttn with your corporate logo on top.
- **Visibility & control over your business:** Web-based management site shows you real-time usage statistics and lets you remotely configure your btttns.
- **Works the way you want:** Connect btttn to your business systems or have it simply email or text you.

**Call us for a
Proof-of-Concept!**
