

HOW IT WORKS

Your customer
presses the bttn®

**bt.tn® server
creates a request
in your system**

Your cloud

bttn® lights up
green and a courier
is dispatched

**On-demand collection of
recurring shipments.**

**On-demand delivery of
recurring shipments.**

bttⁿ® in a nutshell

bttⁿ is a unique way of automating processes and interacting with your customers: an Internet-connected, physical push button.

When your customers have recurring deliveries or collections, let them simply press a bttⁿ to make the request.

bttⁿ automates the task so your busy customers don't need to install apps or go online to enter details in multi-page forms. It saves their time and prevents human errors.

Your customers will love the simplicity that you bring to their logistics.

bttⁿs connect via mobile data or SIGFOX and run on batteries or USB chargers. They are available in two sizes: bttⁿ (Ø 100 mm) and bttⁿ Mini (Ø 69 mm).

Benefits

- **Best user experience brings more business and makes customers stay:** Just press the bttⁿ to request a delivery or collection.
- **Maximal brand presence:** Nothing yells "world class service" like a bttⁿ with your corporate logo on top.
- **Visibility & control over your business:** Web-based management site shows you how often requests are being made.
- **Works the way you want:** Connect bttⁿ with your business systems or have it simply email or text you.

**Call us for a
Proof-of-Concept!**
