

HOW IT WORKS

Your customer presses the bttn®

Our bt.tn® cloud submits a ticket to your helpdesk or CRM

bttn® lights up green and your on-demand service happens

References

btttn is a unique way of interacting with your customers: an Internet-connected, physical push button. The following are examples of businesses using the btttn.

SAMSIC: The leading facilities management company in France and Central Europe. SAMSIC uses btttns to let customers report any need for service: Cleaning, repairs, and feedback on facilities.

Nordic Cinema Group: The leading movie theatre group in the Nordics. The group uses btttns to let customers report any problems in movie playback or to request entry during a show.

btttns connect via mobile data or SIGFOX and run on batteries or USB chargers. They are available in two sizes: btttn (Ø 100 mm) and btttn Mini (Ø 69 mm).

Benefits

- **Better customer satisfaction & more sales:** Your customers just press a btttn when they need service or supplies.
- **Maximal brand presence:** Nothing yells “world class service” like a btttn with your corporate logo on top.
- **Visibility & control over your business:** Web-based management site shows you real-time usage statistics and lets you remotely configure your btttns.
- **Works the way you want:** Connect btttn to your system via HTTP/REST API or have it simply email or text you.
