

HOW IT WORKS

Your customer
presses the bttn®

bt.tn® server alerts
your staff or places
an online order

Your cloud

- In-store assistance calls.
- In-store promotions & surveys.
- Logistics & process management.
- Home deliveries.

bttn® lights up
green and service
is on its way

bttⁿ® in a nutshell

bttⁿ is a unique way of interacting with your customers and automating tasks: an Internet-connected, physical push button.

Your customers can just press the bttⁿ to call assistance with items they cannot find or if they have any questions. Ordering recurring home deliveries is also possible if you give bttⁿs to your customers.

bttⁿ also works great for in-store process management: One press to order stock replenishments, alert maintenance staff, count events, or signal about an incoming delivery.

bttⁿs connect via mobile data or SIGFOX and run on batteries or USB chargers. They are available in two sizes: bttⁿ (Ø 100 mm) and bttⁿ Mini (Ø 69 mm).

Benefits

- **More sales & happier customers:** Just a press of a bttⁿ to get service.
- **Maximal brand presence:** Nothing yells “world class service” like a bttⁿ with your corporate logo on top.
- **Visibility & control over your business:** Web-based management site shows you in real-time how service calls are being made.
- **Works the way you want:** Connect bttⁿ with your business systems or have it simply email or text you.
