

HOW IT WORKS

Receptionist
presses the bttn®

Our bt.tn® cloud
sends an order to
your dispatch center

bttn® lights up green
and a taxi arrives

bttⁿ® is used by leading taxi companies

bttⁿ is the easiest and fastest way to order a cab: a connected physical button.

"With Concierge [bttⁿ], we can gain more visibility at the point of sale, improve our customer satisfaction and customer lock-in."
- Yann Ricordel, CEO, Les Taxis Bleus, Paris, France

"We've placed our bttⁿs in the existing businesses that always used our service. It's much more convenient for the client to press a button versus making a telephone call to order a cab. We're receiving an average of 500 trips per week from the newly deployed buttons."
- San Diego Yellow Cab, California, USA

Custom-brandable, interchangeable cap

Intuitive feedback lights around the cap

Triple-action: 'Short press', 'long press' & 'not pressed'

bttⁿ Mini

bttⁿ

bttⁿs connect via mobile data or SIGFOX and run on batteries or USB chargers. They are available in two sizes: bttⁿ (Ø 100 mm) and bttⁿ Mini (Ø 69 mm).

Benefits

- **More sales & happier customers:** Just a press of a bttⁿ to order your service.
- **Maximal brand presence:** Nothing yells "world class service" like a bttⁿ with your corporate logo on top.
- **Visibility & control over your business:** Web-based management site shows you real-time usage statistics and lets you remotely configure your bttⁿs.
- **Works the way you want:** Connect bttⁿ to your system via HTTP/REST API integration or have it email or text you.
