

## GI Supply Rigger Work Price List

### General Information:

All prices shown are in GBP and correct at time of writing. Prices are subject to change without notice, but we will always be upfront about any amendments.

Typically, for all work on uniforms, there will be around a 6 week delay, but this depends on how busy we are and the work required. Please contact us if you may need it sooner, as we may be able to help.

**ALL CLOTHING MUST BE FRESHLY LAUNDERED BEFORE WE WILL WORK ON IT!**

We reserve the right to refuse to work on your uniform if it is not clean, or charge for any laundering costs involved to bring it up to scratch.

We use 100% cotton OD7 waterproofed canvas for all of our reinforcing and M43 pockets.

All prices are plus postage, but we will happily deliver or collect from any shows we are attending. For latest information, please sign up to our news letter, or see our website.

### M42 Uniforms

In order for us to apply reinforcing as per Overlord specifications, jump suits need to be stripped of ALL previous modifications. We will do this for you, but there is an additional fee involved as it's a very labour intensive process. If you can do it beforehand, it will obviously work out cheaper.

### 17th Airborne pockets

For operation Varsity the 17th airborne division had their uniforms modified in a similar way to those used by the 101st and 82nd airborne divisions earlier in the war. However, the pockets were a distinctly different shape and some units also had canvas knee pads sewn onto their trousers as well.

These are a special order item and not something we always have ready to go. Please allow around 4 weeks for assembly.
