COPYRIGHT MIGHTY MAX CART® 2023

TOOLS REQUIRED

(NOT INCLUDED)

PLIERS & HAMMER

STEP 1- DETACH END CAPS

- Use a pair of pliers to remove the black plastic End Cap. Simply grip the cap with the pliers, twist it upwards, and then apply enough force to pull it off.

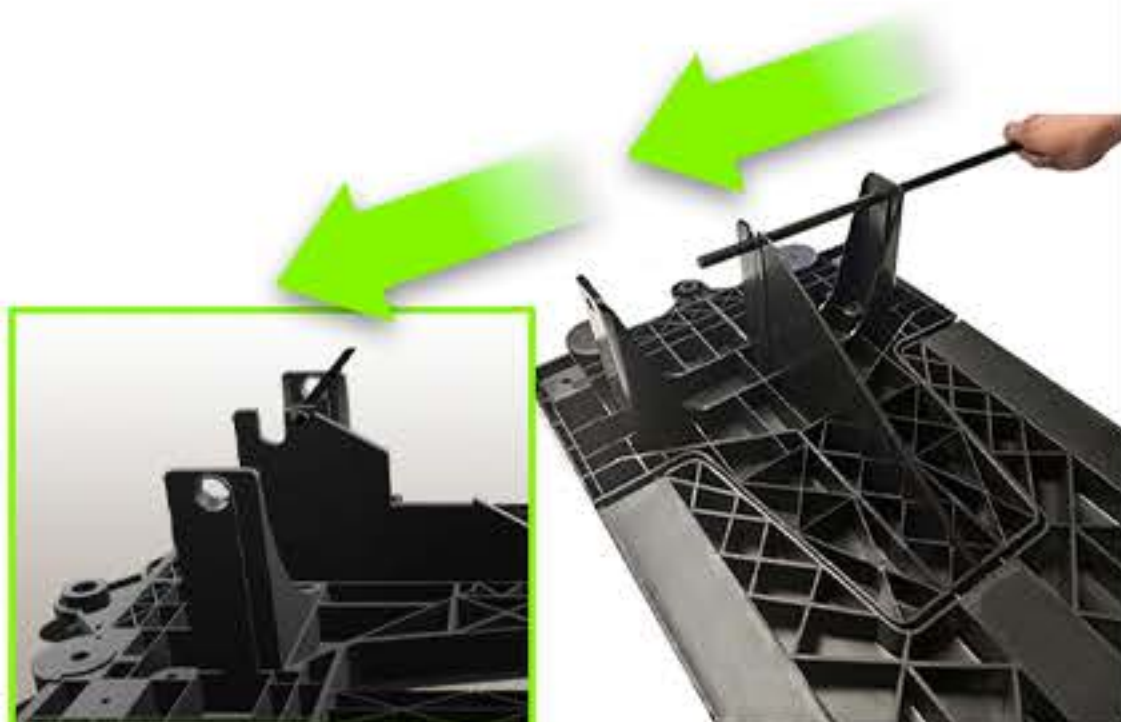

STEP 2- REMOVE RETAINING WASHER

- Detach the retaining Metal Washer on the Axle. Pinch one side of the washer, and pull upward using the pliers. Then pull it downward, repeating this process until the washer is completely removed.

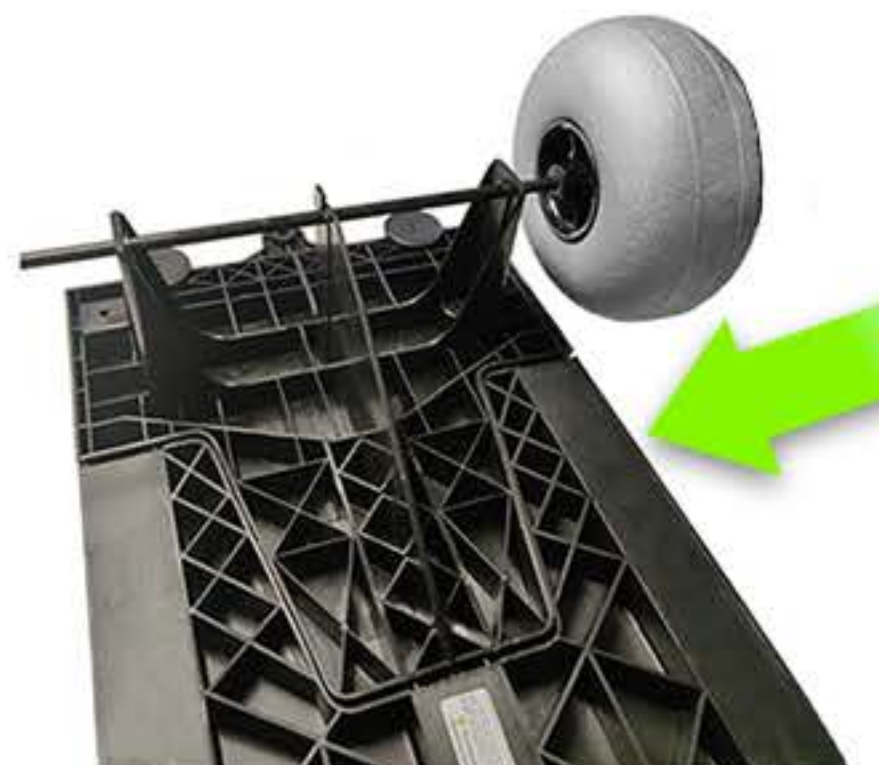

STEP 3-TAKE OFF WHEELS AND AXLES

- Remove all four Wheels and slide out the Axles. If you encounter difficulty, gently tap the Axles, using a hammer to aid in their removal.

STEP 4- INSERT AXLES IN FRAME

- There are holes in the 5th Wheel and Rear Frame Assemblies specifically designed to accept the Axles. Slide the 19 inch axles included in your kit through the frame holes.

STEP 5- PLACE WHEELS ON AXLES

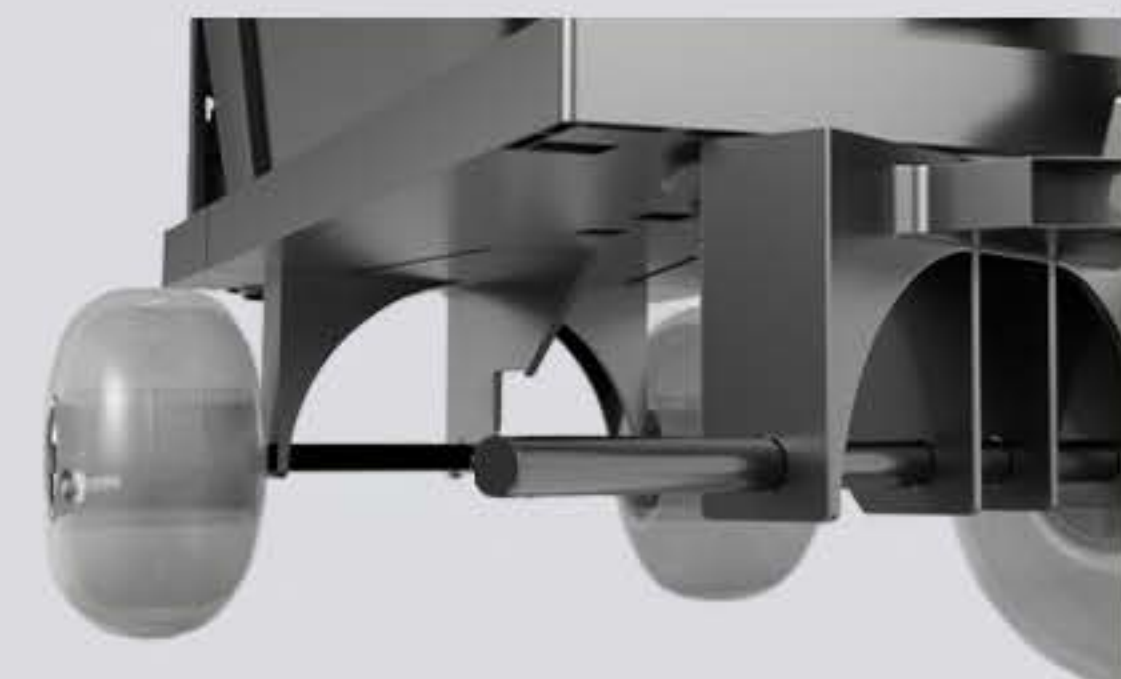

- Beach Wheels must slide on Axles with flat hub facing outward. Insert all 4 Wheels on Axles.

STEP 6- SECURE WHEELS

- To secure the Beach Wheel to the Axle, first place a Black Nylon Washer followed by a Cotter Pin. There is a hole on each end of the Axles for the Cotter Pins to be inserted. Repeat the same process for all wheels of the cart.

INTERCHANGING WHEELS

STEP 1- REMOVE COTTER PINS, WASHERS , AND WHEELS

- To begin the wheel interchanging process, carefully uninstall all Cotter Pins, Washers, and Wheels from the cart.

STEP - REINSTALL MULTI-PURPOSE WHEELS

- [Only the Multi-Purpose Wheels require the 1 inch Black Nylon Spacer] To install start by sliding the 1-inch Black Nylon Spacers onto the axle, followed by the wheel securely in position.

STEP - REINSTALL DOLLY WHEELS

- [Dolly Wheels Don't require extra 1 inch Black Nylon Spacer] Once wheels are installed, place the Black Nylon Washer on the outside of the wheel followed by a Cotter Pin back onto the Axle. Repeat the same process for all wheels of the cart.

BEACH WHEEL USE AND CARE

Congratulations on your purchase of the Mighty Max Cart Beach Wheels! Here are some important guidelines to ensure that you can enjoy your cart to the fullest:

WHEELS: Your beach wheels come pre-inflated from the factory and will self-inflate in the heat and hot temperatures. Do not attempt to inflate them further ; must have 2.5 psi.

LOAD CAPACITY: The Mighty Max Cart can handle heavy loads with ease. However, please note that the load capacity is lower when the cart is expanded. Be sure to distribute the weight evenly to avoid tilting and secure any loose items. Never exceed the maximum weight capacity of your cart, which is 150 lbs.

TRAVERSING HILLS: When traversing hills, always go straight up or down the hill. Never traverse a hill sideways, as this could potentially cause the wagon to roll over.

UNEVEN TERRAIN: Avoid terrain that will cause one side of the wagon to be higher than the other side. Like traversing a hill sideways, riding on uneven terrain could cause the wagon to tip over.

CLEANING: Simply hose down your cart with water and let it dry. Avoid using any harsh chemicals or abrasive materials that can damage the cart or wheels.

STORAGE: Do not keep items on the cart when not in use or in storage for a long period of time. To ensure long-lasting durability, flip the cart onto its back with the wheels facing upwards or hang on a wall.

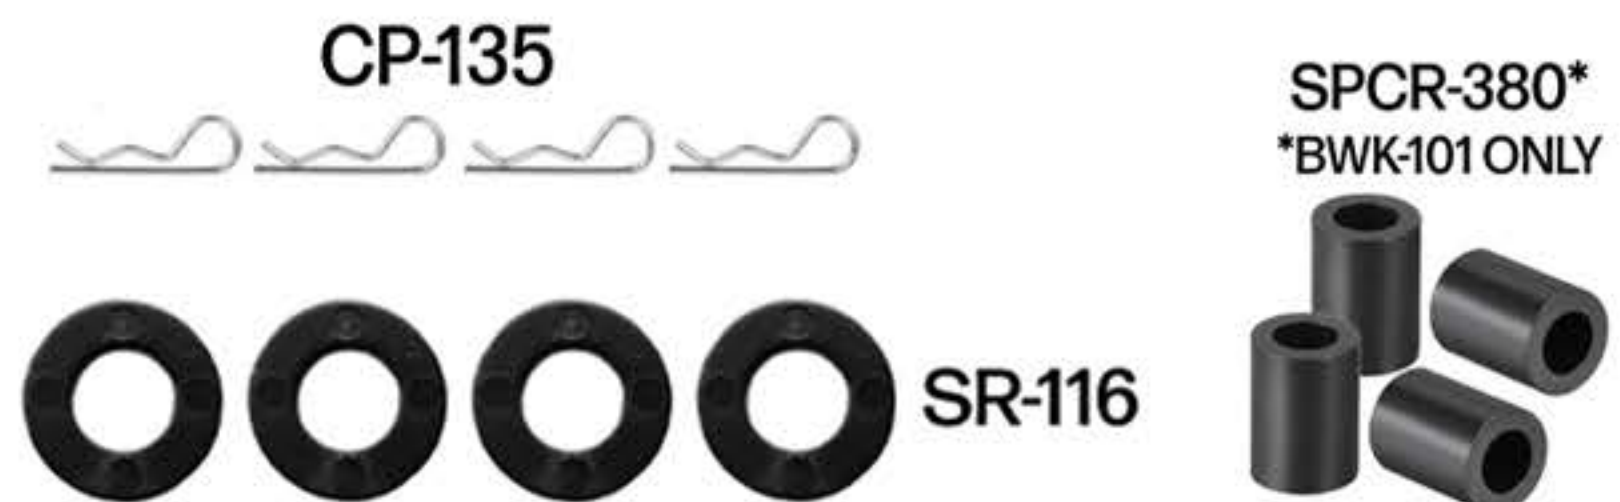

We hope you enjoy using your Mighty Max Cart Beach Wheels! If you have any further questions or concerns, please contact our customer service team ; support@mightymaxcart.com

DO NOT INFLATE
