

The SB-28 is ideal speaker wall mount for satellite speakers weighing up to 3.5kg/7.7lbs, installing to the single thread or one of the double threads of the speakers. It is an easy and fast installation solution with slide-in wall plate design. The arc-shaped adjusting structure allows tilting 20° upwards and downwards, 70° left or right to deliver ideal sound conditions. The adjusting knob offers an easy tool-less way of angling the speaker to deliver desired sound conditions. The mount puts the speakers 64mm from the wall when fully stretched.
