

Smittybilt® XRC Armor Fenders

These front fenders completely substitute the stock application. The rear fenders are a fender and corner guard in one. They are designed to provide the maximum protection and clearance possible when you're pushing your rig through the toughest conditions. Each piece of XRC JK Armor is manufactured out of 3/16" cold rolled steel and is powder coated black textured.

Application	Part No.	Price

Warrior™ Flat Fenders - Tubular Steel

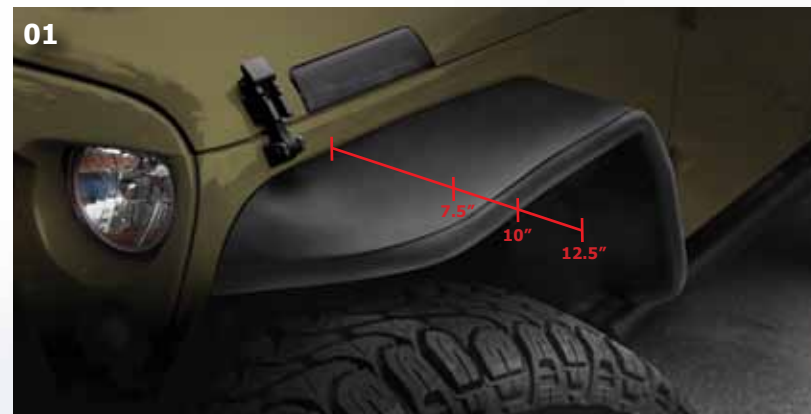

Add at least 2" more in clearance with these solidly built Tube Flares. Designed and made by Warrior, USA, we like that they come powder coated. That's a major expense saved over raw flares. Quality is very good. Hardware is old school but holds up really well. 1 1/2" tubing and optional LED Signal Light Kit can be incorporated into the leading edge of the front flares, complete with wiring harness for an easy installation which is sold separately. Black powder-coated to provide a durable finish and paint-able. Sold as a pair.

POISON SPYDER

Poison Spyder Crusher Flares

When dealing with rocks, you can either be crushed, or be the one doing the crushing. Poison Spyder Crusher Flares are precision roll-formed to conform perfectly to the body lines of your Jeep. Options abound with front and rear Crusher Flares, from flare width and style to steel or aluminum construction. This allows you to customize your Jeep with the products that are a perfect fit for your specific use. Poison Spyder Crusher Flares are constructed using 1.5" X .120 wall DOM (Drawn-Over-Mandrel) structural steel or 1.5-inch X .188 wall aluminum tubing as the outer "rub rail". This tubing provides better resistance to crushing, kinking, and bending than competitors' flares made with thinner wall, welded seam tubing. Lightweight aluminum Crusher Flares weigh under 12 pounds, nearly two thirds less than the bombproof steel Crusher Flares.

Engineered to provide corrosion protection and weather-resistance. Our proprietary 6-stage system starts with media blasting the entire part, to remove contaminants and prep the metal surface for the best possible adhesion. Next, any seams are sealed with 3M Scotch-Weld to block moisture from entering and causing corrosion where the powder can not reach. The first coat to be applied is a zinc-rich powdered black primer, which is baked on to form an impenetrable bond between the metal product and the coating. The primer is black—rather than traditional gray—so that any rock chips or trail damage are less conspicuous. The final top coat is an industrial grade, "super-durable" architectural finish in semi-gloss black, which is engineered to retain its appearance through years of exposure to sun and weather. SpyderShell is a coating process unmatched by any other Jeep armor aftermarket manufacturer, for which they are confident in offering a 5-year warranty on materials and workmanship.

JCR Crusader, Vanguard & Mauler Flares

The more modern design of the JK Wrangler introduced significant engineering challenges for armor companies who, at the time, had only designed armor systems for previously square Jeeps. JcrOffroad met the challenge head-on, immediately designing innovative bumpers, rock sliders, and fenders to not only fit the lines of the new JK, but enhance them. To do this, They started with their trail-proven engineering from previous Jeep models, then added a modern style that is cohesive from the front to the back of your Jeep. Sharp, aggressive lines match the new Wrangler design cues, while features like built-in marker lights and mud shedding inner fender liners keep function at the forefront of the product line design. JcrOffroad bumpers, fenders, and rock sliders – mix and match your favorites for an integrated package that looks as great as it performs.

Smittybilt® XRC Skinny Fenders - Textured Steel

The skinny XRC Fender Flares are a 100% steel construction for extra durability and feature a black power coated finish for immediate use. The "Less is More" design helps to increase maximum suspension articulation and clearance. You can clear 35" tires with almost no lift and 37" with only 3" of lift.

Application	Part No.	Price
07-17 Wrangler 4-Dr 2" wider than stock	SB 76837	\$300.00

Bushwacker® Flat Fenders - ABS Textured

Add additional clearance and tire coverage with Bushwacker® 2" wider than stock flat fenders. The flares are UV protected against fading. DOT approved LED marker lights are included. The TPO material is similar to the OE textured flares. Easy no-drill installation.

Rugged Ridge® Hurricane Flat Fender Flares

Jeep® enthusiast can now get that aggressive off-road look and tire clearance with the complete newly designed Hurricane Flat Fender Flares. A combination of popular fender flare styles, this design was inspired by earlier concepts and specifically the 1941 Willy's MA. The double bolt pockets provide a modern twist on the traditional flares and come with two sets of durable corrosion resistant fasteners. The stainless steel or black fasteners allows the consumer to customize their own look.

Application	Part No.	Price
07-17 Wrangler, Textured	OM 11640.10	\$515.00
07-17 Wrangler, Smooth	OM 11640.25	\$515.00

Rugged Ridge® Inner Fender Liners

Designed for use in combination with the Rugged Ridge® All Terrain Flat Flares for JK, 11620.10 or any other Flat Fender Solutions, these wheel well liners help keep mud and debris out of the engine compartment and provide a clean finished look. Constructed from durable HDPE the wheel liners replace the factory wheel well liners that must be removed when running aftermarket flares. Simple bolt in installation, no cutting or drilling required. Kit includes all four wheel well liners and mounting hardware. These work great for Warrior® Tube Fenders, Smittybilt® XRC Fenders and Bushwacker® Flat Fenders.

Application	Part No.	Price
07-17 Wrangler	OM 11620.50	\$325.00

Bushwacker® Pocket Style Flares, ABS

All Bushwacker® flare kits are made of ABS and will install using factory holes, giving the look of being bolted onto the Jeep®. The factory Width version looks great with any aftermarket or factory wheel combinations. The "Extended Coverage" Version is 2" wider than stock. They look best with 10" wide wheels with deep offset such as -44mm. We recommend the textured finish if you don't intend to paint the flares in vehicle color.

MOPAR® High Top Fender Flares

Maintain a low center of gravity while allowing for a 35" tire without a lift, or a 37" tire with 2" of lift. Fender flares attach to the stock mounting holes without trimming the sheet metal and bring a tough new style to your Jeep Wrangler. The flares are manufactured with a durable fade-resistant black texture finish that matches all factory parts. These flares meet all FCA US standards.

Rugged Ridge® Hurricane Flat Fender Flares

The Hurricane Flat Fender Flares feature a unique double bolt pocket as a modern spin on classic pocket flare styling. Engineered for both form and function, the fender flare's unique shape complements the Wrangler's rugged looks and lines, while mounting high up on the fender for extra clearance for oversized wheels and tires and thereby offering 2.89-inch more tire coverage and 1-inch more tire clearance over similar OE designs. Each flare features a 2-inch larger wheel opening allowing for larger wheel/tire combos. Each 6.68-inch wide fender flare is constructed from durable black injection molded thermoplastic that can be painted or left unfinished. The Hurricane Flat Fender Flares come complete with a set of durable black corrosion resistant fasteners.
