

Halogen Lights

Light Installations

We like to impress our customers with a super clean factory-look light installation. Here is how we approach light installations: First, we select the mounting spots. Off road lights are well positioned at windshield level, whereas driving lights and fog lights are best positioned at bumper level. Secondly, we select a convenient location for our switches. Finally, we run a wiring harness. We always run each wiring harness separately. This enables us to isolate electrical problems should they occur. Sometimes it seems challenging to find a good passageway for the wiring. A good way is to just drill into the cowl, wrap the wiring in wire loom and neatly insert plenty of it into a grommet.

Often Jeeps prefer their lights at windshield level.

Light Brackets are available for every model year. Page 149-150

We like to have the harness from the light as short as possible. The below shown grommet is a nice tight fit for the wire loom. It is still easy to change things around at a later date if required. This approach is way better than squeezing wires through a seal.

There are plenty of light console solutions from Rugged Ridge® and Daystar for all model years. However, sometimes a good spot and a good switch is all you need. You can install up to 4 switches to the A-pillar. See other options on page 160.

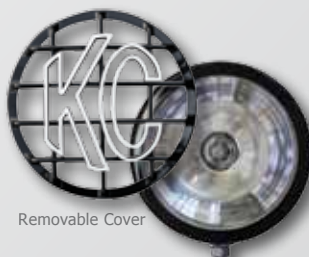

01 KC® Apollo Pro Series

KC® Apollo lights are made of tough black Polymax with a flat profile. These lights are our preferred Halogen lights for environments that cause rust on steel parts. Apollo Series lights are available in 5" round or 6" round models. Stone Guards are included. Comes complete with wiring harness and switch kit.

NOTE: For Mounting Solutions see Pages 149 - 150.

Application (Pair)	Part No.	Price
5" Spot	100W KC 450	\$135.00
5" Driving	100W KC 451	\$135.00
5" Fog	100W KC 452	\$135.00

Windshield Light Mount Brackets for 07 - 16 Wrangler JK

**Rigid Industries Dual A-Pillar Light Mount Kit**

These Jeep® JK Dual A-Pillar Brackets give you the option to add two of the amazing Dually or D2 LED lights to each side of your windshield on the lower portion of your A-pillars. These brackets mount to your A-pillars and use the existing mounting bolt holes - No drilling or cutting required. They will give your JK a clean, from-the-factory look and allow you to adjust the horizontal placement of the beam. These brackets are made from 3/16" stainless steel and powder-coated black to match your trim and the Rigid Industries lights. These brackets come with a limited lifetime warranty. Lights sold separately.

Dual A-Pillar Light Mount Kit	Part No.	Price
07-17 Wrangler, Black (Pair)	RIG 40335	\$125.00

**Rugged Ridge® Dual A-Pillar Light Mount Kit**

This pair of A-Pillar light mounts from Rugged Ridge is constructed from heavy-duty steel and available in a long-lasting semi-gloss or textured finish. These brackets are easily mounted to the lower windshield mount using the JK's existing mounting bolt holes, meaning there is no drilling or cutting required for installation.

Application	Part No.	Price
07-17 Wrangler, Black (Pair)	OM 11232.30	\$80.00

Rugged Ridge® Lowering Light Bar kit attaches to the Rugged Ridge® XHD Light Bar which positions the lights lower allowing the clearance needed to fit into garages and parking decks.

Windshield Mount Light Bars

The Ultimate Light Bar for your Wrangler! This exciting new design has been created to give the durable look of a five tab light bar with features found nowhere else. Through extensive testing, this heavy duty light bar incorporates a special wind deflector below the light bar to eliminate whistling and "buffeting" of your soft top. Each bar hugs the contour of your windshield providing a great look while not interfering with the use of your hard or soft top. Oversized 2" textured black tubing attaches to your windshield's mounts with no drilling. Each Light bar has five light tabs for use with most lighting options (fits up to five 7" lights).

Application	Part No.	Price
07 07-17 Wrangler, Textured, Holds 5 Lights	OM 11232.21	\$250.00

* CR 488443 is not a full frame light bar. It is a traditional stainless steel bar that mounts on the top of the factory windshield.

LED Head & Fog Light Solutions

Have you ever noticed that the factory Jeep® head lights are nothing to write mom home about? Our Custom-Fit, Plug & Play Kit is the most trouble free kit we have ever used. We are excited to announce that all JK kits fit all models from Base, Sahara and Rubicon. The kit works and installs trouble free and provides proper Low and High Beam. The very bright 6K color temperature allows for dramatically more visibility while driving at night. The bulbs will not flicker nor will you experience any annoying buzzing sounds other kits are known to have. The installation is easy with our step-by-step instruction. The kit comes complete with two H.I.D. bulbs, wiring harness and 2 ballasts. Splicing is not required. NOTE: H.I.D. conversions may not be street legal in your State. Please check with your local D.O.T.

Fender LED Daytime Running Lights

A unique LED lamp mounting system that utilizes the unused space of the Wrangler's front fender flares. Featuring two ultra-bright 5-LED lamps, custom cut-in fender bezels, and vehicle specific wiring harness.
