

2016 was the 50th annual of the Easter Jeep Safari and the 75th Anniversary of Jeep. Needless to say it was a big deal and there was an incredible turn out in Moab, UT. Day long trail rides, cook-outs, vendors and great friends. Going to Moab has been one of our favorite events in the Jeep industry for many years and this year raised the bar even higher. Our F3 Jeep JK rose to every challenge and curried the respect of off road legends and spectators from around the country. The organizers of EJS are fantastic people and we looking forward to join them again next year!

### Airaid® Cold Air Intake Systems

This system features a full length intake tube that draws air through a totally redesigned Cool Air Dam. This combination yields an additional 24 lbs/ft of torque (at low rpm) and an additional 13 Horsepower, a plus for all Jeep® enthusiasts. Intakes are designed to isolate the heat of the engine away from the air inlet, taking advantage of the dense cool air from outside the engine compartment.

### Dyno Test

**BONUS!**

Free TBI Spacer included

### Rugged Ridge® Cold Air Intake System for 4.0l TJ & LJ

More horsepower, better throttle response, and improved acceleration. Polished aluminum mandrel bent intake tube replaces the restrictive factory air box to help improve fuel economy and performance. A black powder coated heat shield separates the filter from engine heat, dirt and debris, as cold air is drawn through a high-flow conical air filter. Unlike other reusable air filters, the dry panel design never needs oiling, which keeps your air flow sensor from being damaged by excess oil! Free throttle body spacer included in this kit.

Application	Part No.	Price
97-06 Wrangler 4.0l	OM 17750.01	<b>\$230.00</b>

### Rugged Ridge® Throttle Body Spacers

The Rugged Ridge® Throttle Body Spacer for 91-06 Wrangler raises the throttle body 1" above the intake manifold, whereas the Throttle Body Spacer for 07-11 & 12-up Wrangler positions it 1/2" in front of the manifold. This optimizes power and performance by drawing in colder denser air. The large bore design allows your system to inhale a larger volume of air producing more horsepower and torque. It features solid aluminum construction with a slick anodized finish, and is a bolt on performance add-on.

Application	Part No.	Price
12-17 Wrangler 3.6l	OM 17755.03	<b>\$50.00</b>
07-11 Wrangler 3.8l	OM 17755.02	<b>\$50.00</b>
91-06 Wrangler 2.5l, 4.0l	OM 17755.01	<b>\$50.00</b>

### PowerAid® Throttle Body Spacers

The PowerAid® Throttle Body Spacer was developed to enhance your vehicle's off idle to mid range performance and efficiency. The "Helix Bore" design of the PowerAid® creates a spinning action of the incoming air. As air passes through your throttle body, this helical effect causes the air molecules to organize and maintain high velocity. The organization and high velocity of the air is extremely beneficial because it helps to provide a superior atomized mixture of fuel and air all the way into the combustion chamber. Enjoy torque gains between 800 to 2500 RPM, and potential increases in your fuel economy, depending on driving conditions.

AEV Snorkel Kit

AEV's JK snorkel can be installed with either our Air Ram or the cylindrical Pre-Filter. Both allow the engine to breathe equally well, but both have distinct advantages and disadvantages when compared to one other. The Air Ram is designed to draw in air and separate rain water from the air charge. It is incredibly rugged and well suited to wooded terrain where impacts with trees and branches are likely. By comparison, the pre-filter is designed to draw in air and separate both rain and dust from the air charge. Though the Pre-Filter lacks the ruggedness of the Air Ram, it is well suited to dry, desert terrain where thick dust is likely. The Pre-Filter is also cleanable and virtually reusable for the life of the snorkel.

Application	Part No.	Price
12-17 Wrangler JK 3.6l	AEV 40306160AA	\$400.00
07-11 Wrangler JK 3.8l & Diesel	AEV 40306220AA	\$400.00
07-17 Wrangler JK, Pre-Filter *	AEV 40306108AA	\$135.00

\* will only fit 2nd Generation Snorkel with 4" Intake Tube

ARB Snorkel Kit

The factory air intake becomes incredibly vulnerable to water ingestion. Anyone who has spent time in off road environments almost certainly would have experienced one of these situations, although a solution to the problem is rarely considered until costly engine damage has already occurred. A Safari snorkel system relocates your engine's air intake point from the relatively low and vulnerable position under the hood to a much higher and safer location where a constant source of cool, clean, dry air is available. Manufactured from premium quality polyethylene, Safari snorkels are incredibly resilient and UV stable.

### XHD Snorkel Air Intake

The new modular XHD Snorkel System from Rugged Ridge® relocates the stock air intake to help reduce dust clogged filters and the risk of hydro-locking your engine. The snorkel comes standard with the Pre-filter Low Mount which relocates the air intake just below the windshield. The optional High Mount Ram intake features an additional 21" to the top of the windshield. This kit works with all aftermarket fender flares, most light bars and roof racks.

**FORTEC® Black Dual Exhaust System by Gibson®**

We are proud to present our FORTEC® exclusive Dual Exhaust System made by GIBSON®. We consulted experts from legendary racing exhaust manufacturer GIBSON® to create a black ceramic coated Dual Exhaust System. Because this kit decreases back pressure it allows the engine to produce more torque and thereby increased engine horsepower by typically 10 to 12 hp. The system is made of aluminum for weight efficiency and ceramic coated for longevity. Some exhaust systems are powder coated and therefore tend to flake. Gibson applies super durable black ceramic coating onto our systems that will last a lifetime. The sound is throaty and installation takes less than an hour.

**Dual Outlet****FORTEC® Dual Exhaust System by Magnaflow®**

We are happy to announce another Dual Exhaust Kit exclusively made for FORTEC®. This Kit is manufactured by Magnaflow® to our exact specifications. It allows the installation of certain Heavy Duty Bumpers that could cause clearance problems with other Dual Exhaust Kits. Our Exhaust Tips are 32" apart. This is the most distance any Jeep® JK exhaust features to avoid contact to any D-ring or Approach Roller Mounts. The Dual Exhaust Kit is made of stainless steel and is ceramic powder coated for longevity. Wait until you hear this kit. The sound is just right, a little throaty, but not too loud. Best of all, you can also expect a noticeable performance increase of about 8-10 hp caused by reduced back pressure. The FORTEC® Exclusive Adjustable Ends allow you to exactly adjust the position of the tips so that they look best with your stock or custom rear bumper. The kit fits 3.6l and 3.8l Wrangler JK & JK Unlimited.

Application	Black	Price
07-17 Wrangler	MF 15160F	\$515.00

**Magnaflow® Black Exhaust Tips**

This Exhaust Tip can be used over the existing exhaust pipe and secures with a clamp. It can also serve as replacement tip for our Dual Exhaust Sytem MF 15160F or GIB 17303B.

Application	Black	Price

# MAGNUSON

## SUPERCHARGERS

### Magnuson Supercharger Systems

Magnuson's Supercharger for the 2007-2016 Jeep Wrangler uses EATON's latest in its line of Twin Vortices Series superchargers. Magnuson's new 6th generation hybrid-roots style supercharger design offers a host of performance benefits over other existing blower designs. Its advantage lies with its four-lobe, 160 degree high helix rotors that provide increased air flow, have a wider operating range, and higher pressure capability while maintaining cooler operating temperatures and a quieter operation. This kit demonstrated a 33% increase in torque and 41% increase in horsepower at Magnuson's facility! Unlike other power adders, with their TVS-style supercharger, all that torque is available right off idle.

Application	Part No.	Price
12-17 Wrangler, 3.6l*	MAG 01-13-36-005-BL	\$5,495.00

# RIPP

## SUPERCHARGERS

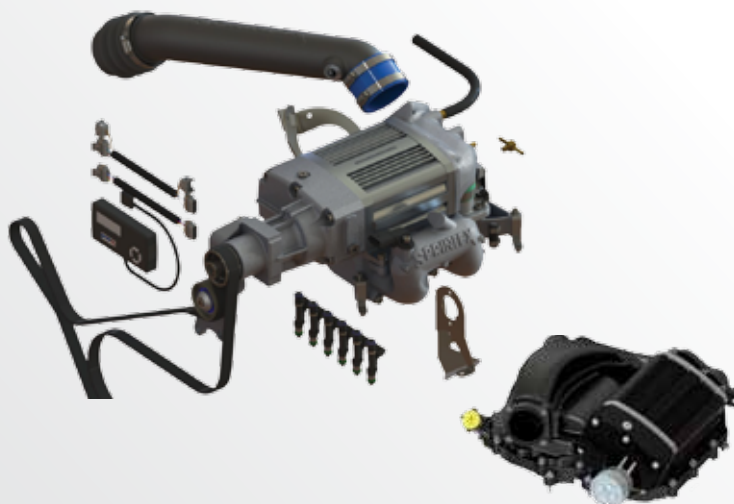

### RIPP Super Chargers

RIPP offers the Worlds First Supercharger system for 12-17 Jeep® Wrangler JK with the 3.6l Pentastar. Key features of this system are: a Vortech V3 Si-trim Self-Contained Centrifugal Supercharger, an air-to-air front mounted intercooler, larger plug and play primary injectors and a RIPP plug-&-play map sensor. Proper ECU calibrations are provided by RIPP via a Diablosport tuner. This kit bolts on in 6-8 hours and is considered plug and play. Producing 8 pounds of boost pressure and tuned on 91 oct. fuel we safely squeezed 325WHP\* and 300ft/lbs\* of Torque on 37" tires. Preliminary tests show an Automatic Pentastar Powered Jeep® Wrangler Unlimited producing only 189 rear wheel HP (WHP) stock. The \*BLACK-OPS\* kit features black powder coated components.

### Sprintex Supercharger Systems

The Supercharger Kit from Sprintex delivers excellent performance, high efficiency and reliability to deliver an instant boost from low RPMs. The kit uses the ultra efficient S5-335 screw compressor which provides a denser charge, creating more power and torque. The robust OEM style moulded automotive glass filled nylon, offering reduced weight and much improved heat soak characteristics. The Sprintex System is suitable for all 07-17 Wrangler without the need for any additional upgrades. We are offering this kit with a Diablo Flash Tuner that is programmable for certain Jeep® variables such as tire size and gear ratios. The kit is a 100% bolt on kit that easily fits under the stock hood. It is also completely reversible. The compressor has its own internal oil supply. This is a fully integrated supercharger system (not a self assemble kit). Estimated installation time is 6-8 hours. Sprintex kits are manufactured under ISO9001 and carry a 12 month or 12,000 mile warranty.

### AEV Hemi® Conversion Kits

Should you be interested in significantly increasing your Jeep's® performance, consider to swap your 3.8l or 3.6l V6 cylinder engine for a Chrysler V8 Hemi®. Just so that there are no misunderstandings: The AEV conversion kits come without an engine. The conversion kits include adapters, wiring harnesses and modules so that the Jeep® knows that is has a new stronger heart beat. We can ship a complete conversion kit or quote you the Hemi® swap including installation cost at one of our shops.

Application	Transmission	Part No.	Price

### AEV HEMI Air Box Kit

AEV's Hemi Air Box Kit replaces the top half of your Hemi air box, allowing for compatibility with an AEV Snorkel. The lower half of your stock V6 Air Box is necessary with this upgrade.

Application	Part No.	Price
07-17 Wrangler	AEV 40306044AA	<b>\$ 230.00</b>

### NAV-TV Back Up Camera System

If your 07-17 Jeep® Wrangler is equipped with the Factory Navigation System, upgrade it with this easy plug-n-play Back-up Camera System. Kit comes complete with wiring harness, camera, AV cable and "Black Box". Easily programmable via USB cable.

Application	Part No.	Price
07-17 Wrangler, with Bumper Camera	NAV NTV-KIT260CT-CAM5	<b>\$600.00</b>
07-17 Wrangler, with Spare Tire Camera	NAV NTV-KIT260CT-KIT614	<b>\$650.00</b>

### NAV-TV Wrangler-CAM Camera Backup Kit

The Wrangler-CAM includes a full color camera with AV cable and custom bracket which mounts directly to the spare wheel mount on Jeep® Wranglers. The camera is positioned to view through the spare wheel through the spokes. This up-grade kit does not include the module or wiring harness - it is for the camera & bracket only.

Application	Part No.	Price
07-17 Wrangler (Camera)	NAV NTV-KIT614	<b>\$300.00</b>
07-17 Wrangler (Module)	NAV NTV-KIT260CT	<b>\$400.00</b>

### Hypertech® Interceptor™ Tuner

The Interceptor™ mounts under the hood of your Jeep® and plugs into the factory harness to constantly monitor your Jeep's® functions. It then automatically recalculates the factory's computer performance calibrations with Hypertech Power Tuning. This means more horsepower and torque, quicker acceleration, better drive-ability and improved gas mileage.

Application	Part No.	Price
12-14 Wrangler	HYP 705006	<b>\$360.00</b>

### SprintBooster Throttle Response

SprintBooster is a do-it-yourself performance enhancement module that can greatly improve throttle response in your Jeep® Wrangler JK. SprintBooster works with the "drive-by-wire" electronically controlled throttle system. The module sends an improved signal to the ETC (Electronic Throttle Control) which is amplified or "boosted" so that throttle is noticeably more responsive throughout the entire rpm range. Simple plug-N-play installation requires no drilling splicing or vehicle modifications. Installs above the accelerator pedal in minutes. The included wired pendant provides selectability between 3 different acceleration programs. With pendant LED light off, factory setting is maintained. Green LED signals moderate acceleration gain while Red signals an aggressive setting. The programs can be changed on-the-fly so the driver has the ability to switch between the different programs while driving. Two Year Limited Warranty.

03

### Diablo inTune i2 & Trinity Programmer

Want to increase horse power and torque to your Jeep®? DiabloSport's dyno tested performance tunes are pre-loaded into each inTune or Trinity unit. Trinity functions not only as a programmer but also as a customizable monitoring device with color touch screen. The Trinity is one of its kind, allowing full Reflash & Reprogram capability, customizable Gauges - all displayed and controlled on a full color touch screen. Extensive tuning support and data logging are just a few of the features and capabilities. The tunes work great whether on a stock Jeep®, or even mildly modified (like a cat back exhaust and cold air intake). Both tuners save a copy of your Jeep's factory data in it's memory and don't leave no footprints to your Jeep® when restored back to factory settings.

DIABLOSPORT

Application	Part No.	Price
