

DANA® Gear Ring & Pinion Conversions

Factory OE supplier DANA® is our first choice when it comes to axles and gear upgrades. Ring & Pinion upgrades are the most effective way to regain the performance loss that occurs when lifting a vehicle and installing larger tires.

DANA® 60 Heavy Duty Front & Rear Axles

Ultimate DANA®60 front and rear axles feature improvements throughout that are designed to give you an advantage across even the most brutal terrain. The Ultimate DANA® 60 features massive Spicer SPL 70 universal joints, delivering optimal performance for lifted vehicles with larger tires. You not only get a higher torque load, but with new "rock solid" seals you get peak protection from environmental contaminants. In addition, Spicer 35 spline SAE-4340 nickel chromoly steel axle shafts help meet the rigors of off-road, providing maximum strength and durability for vehicles with larger tires.

AEV DANA® 44 Differential Cover

AEV designed this cover specifically for the Front and Rear DANA® 44 axles found in the 07-17 Jeep® JK Wrangler, so you'll notice it's a bit different than competitive covers that are built for a wide range of Dana 44 applications. The AEV JK Differential Cover features two fluid level ports, placed at the correct level to meet factory specifications for both the front and rear axles, eliminating the need to guess on oil levels or use a dipstick to figure out the correct amount of oil.

Application	Part No.	Price
AEV Front or Rear	AEV 10404005AB	\$210.00

DANA® 44 Differential Cover

Designed and engineered for off-road applications with an aggressive look to match trail-ready strength, Spicer® Off-Road Differential covers are manufactured from high-strength, nodular iron. Built with ribbing to protect differential components for off-road environments, they also enhance the look of your undercarriage. They also feature a raised fill plug for increased fluid capacity on high pinion angles. Includes hardware and drain plug.

Application	Part No.	Price
DANA® Front or Rear	DAN 2020036	\$265.00

Jeep® DANA® 44 Differential Cover

Fits Front and Rear DANA® 44 found in the 07-17 Jeep® JK Wrangler. The MOPAR® Differential Cover features one fluid level ports, placed at the correct level to meet factory specifications for both the front and rear axles, eliminating the need to guess. Modular castings for increased strength and protection. Cover comes with exclusive "Jeep®" badging.

Application	Part No.	Price
DANA® Front or Rear	MP P5155446	\$210.00

Rugged Ridge® Boulder Aluminum Differential Covers

The new matte black Rugged Ridge® Boulder Aluminum Differential Covers are constructed from A356-T6 cast aluminum for strong impact resistance and feature a precision machined sealing surface, allowing gaskets or RTV sealant to be used for a leak-free seal. Each cover is designed to help protect internal components from damage caused by contact with rocks and other terrain off-road as well as aid in dissipating heat from differentials. These covers also come complete with a magnetic drain plug for protection against costly damage from metal particles that can accumulate in gear oil and include a specially designed dipstick bolt to help Jeep® owners avoid under or overfilling their differentials.

Application	Part No.	Price
DANA® 44	OM 16595.12	\$ 90.00
DANA® 30	OM 16595.13	\$ 90.00
DANA® 35	OM 16595.14	\$ 90.00

Poison Spyder® Bombshell™ Differential Covers

Protect your factory differential covers with these heavy duty skid plates. Designed to fit the contours of your stock differential cover. Constructed of durable 3/16" black powder coated steel, these skid plates will help you slide over obstacles and not get hung up. Includes replacement mounting hardware and instructions.

AEV Front Skid Plate

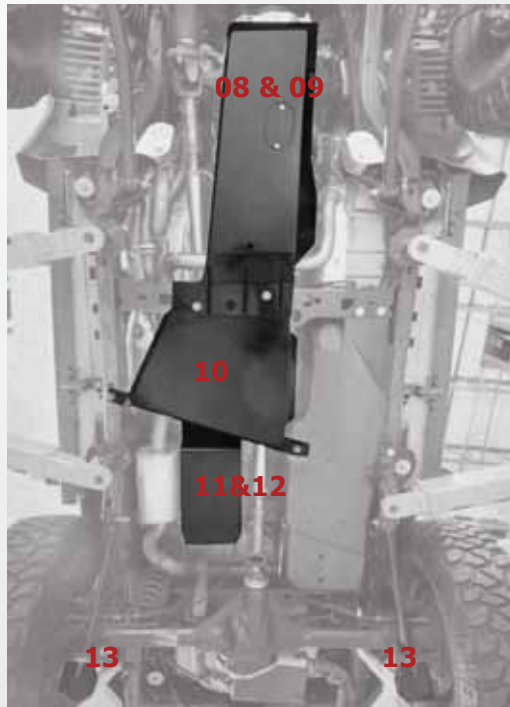

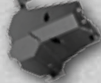

AEV's 1/8" thick, stamped steel Front Skid Plate protects your sway bar, impact beam, and steering as well. Designed to work with both the AEV Premium Front Bumper and Tubeless Front Bumper.

Application	Part No.	Price
07-17 Wrangler	AEV 10303005AD	\$350.00

**AEV Nth Degree Rear Slider**

Protect your DANA® 44 differential, drive shaft on your JK as well as the lower CV Joint. Each unit is specially designed to fit your DANA® 44 rear axle and take up virtually zero ground clearance.

Application	Part no.	Price
07-17 Wrangler	NTH24220AB	\$280.00

**Rugged Ridge® Skid Plates**

Rugged Ridge® are engineered to protect the most vulnerable areas of a Jeep's underside. The Skid Plates shield eight major exposed mechanical components: steering, differentials, transfer case, engine, transmission, suspension arms, air conditioning and muffler. A simple bolt-on installation, and you have an easy solution to help prevent expensive damage. Each Skid Plate is constructed of 3/16-inch heavy-duty steel and comes standard with both a durable black powder coat and rust-resistant E-coating. The frame mount design utilizes existing factory bolt holes and incorporates special gussets and fully-welded brackets.
