AEV Tools & Accessories

The **AEV KatanaBoy** was new to us but has proven to be an amazing tool. Unfolded, this saw measures nearly 4 feet long and makes clearing downed trees literally a breeze. Once used, you'll never leave without it going off the paved road.

The little brother to the KatanaBoy, is the **AEV BigBoy**. It can be right at home under the seat of your Jeep®. With 5.5 teeth per inch and a rubber-cushioned, double-fist handle, you'll have all the cutting power you need to clear a trail or cut firewood, all in a compact package.

While small and compact, this feisty chunk of Japanese craftsmanship won't let you down when it comes to clearing trails or cutting up small timber for that evening fire. From the moment you handle the **AEV Ono**, you will know it is destined for your next venture into the great outdoors and will become a regular part of your camping gear for a long time to come.

The **AEV Edition 585 Mini-Barrage** by Benchmade is a premium spring-assisted knife, the ideal choice for someone looking for a high end, general purpose pocket knife. These AEV Edition Pocket Knives showcase the quality and dependability that has made Benchmade world-famous. (*)
