

## Oasis Tent Instructions (Same for all Versions)

1. Remove tent spikes and tent poles from bag.

2. Unroll cover behind vehicle.

3. Insert tent poles in pocket of cover and secure front of tent to ground spikes or sandbags. (It is best to position vehicle where wind is blowing directly into tent area. If this can not be achieved then point orange cord and spikes or sandbags in direction that wind is blowing to secure tent from wind pushing on tent pole.)

4. Insert ground spikes or sandbags at each strap points provided on tent. (If using sandbags, insert tent pole into sleeve attached to sandbag to secure tent poles in arched position.)

5. Secure Velcro at rear of tent area just above seatbelt attachment.

6. Enjoy!
