Singularity
by PRISM

Choosing colours from a screen for print purposes is never perfect. If you need an exact match for brand purposes or other reasons, please refer to the physical pantone formula guide. We will use the coated pantone colours to match the colour you choose for your design as close as we can. Please be aware, changing screen brightness and other settings can impact the way a colour appears on screen. So if you want to get best practice, specify a pantone from a physical Pantone Formula Guide
