

PRISM'S JERSEY RANGE

THE LIGERA RANGE BY PRISM

Prism's Ligera garments represent the pinnacle of cycling performance apparel. Designed with a pro-fit in mind, this garment enjoys a low colour and longer sleeve lengths to ensure it mould's to your body and stays in place the entire ride.

The mixture of Swiss and Italian fabrics have been chosen with breathability and to promote airflow to keep you performing on even the most taxing rides.

The race cut garments in the Ligera Range increase by half sizes to make sure each jersey is moulded to the needs and physique of the rider. This can lead to some riders needing a larger size than they would usually.

THE GRAND TOUR JERSEY BY PRISM

The Grand Tour Jersey is our Mid-Race cut jersey. Constructed of All-Italian fabric, this summer weight jersey wicks sweat on your longest adventures and keeps you performing in both race and more relaxed café rides.

The mid-race cut is ideal for someone who is looking for a slightly more forgiving jersey than a true race cut, or who may want to wear a summer base layer under their jersey.

THE SPRING CLASSICS RANGE BY PRISM

This is THE best value jersey on the market today. Using a blend of fabrics from premium European and Korean fabric mills, this garment is a remarkably high quality jersey at this price point. Ideal of long rides and race environments, the breathable fabrics and choice of race or relaxed fit make this an ideal garment for someone looking for an entry level into the Singularity experience.

The race cut garments in the Spring Classics Range increase by half sizes to make sure each jersey is moulded to the needs and physique of the rider. This can lead to some riders needing a larger size than they would usually.

* Gus (Pink) is 185cm and 76kg and is wearing medium knicks and a Medium Race Cut, Ligera Jersey. Kaine (Blue) is wearing a Medium jersey and Knicks and is 184cm and 75kg

* Sean is wearing a the Spring Classics Relaxed Cut jersey for commuting in a size XS. Sean is 177cm and 67kg. Sean is shown here enjoying a bit of the old Mothers Milk after a hard day on the tools
