

SF015 Solar Woodland Waterfall Instructions

By All Solar Central

www.allsolarcentral.com

Thank you from the entire ASC family for purchasing an ASC solar product! Please read this entire booklet before assembly.

Package contents:

- 1 x Woodland Waterfall
- 1 x Door Cover
- 1 x Water Pump
- 1 x Solar Panel
- 1 x Solar Panel Bracket
- 1 x Extension Tube
- 1 x Ground Spike

Notes: If there is any damage to the product or missing parts, please contact us at 1-626-582-8898 or www.allsolarcentral.com/contactus

Assembly Steps:

1. Place your new fountain to a desirable place.

2. Attach the pump to the hose from access panel on the back of the Woodland Water Fall Fountain. The pump cable exists from the back access panel.

3. Fill the fountain with appropriate amount of water to fully submerge the pump.

4. Connect the bracket, tubes and spike together. Then attach the solar panel to the bracket. Slide the holding bracket into the inside lip of the top half of the solar panel frame. The bracket holds the weight of the solar panel. The solar panel can be adjusted for optimal sunlight by using the wingnut. Please see the diagram.

5. Insert the spike into the ground. Position the solar panel so it's facing south (in northern hemisphere) as much as possible to maximize daylight hours. It is important to angle the solar panel to face the sun when the sun is at its highest point. Ensure the solar panel is not shaded by trees, shrubs or buildings.

6. Connect the Pump to the back side of the Solar Panel. **IMPORTANT!!** Slightly twist the connectors when connecting to make sure the rubber seals are fully in the grooves.

Notes: Pump Kits might vary. Please refer to the Solar Water Pump Kit Instructions for more information.

7. Now your new fountain is assembled and ready to use.
