Quick Installation Setup Guide

Because Spills Happen

Hubbell Countertop Receptacles are Spill Test Compliant

Key Benefits
- Surface or flush mount options with seven different finishes
- Water and tamper-resistant face
- Compact shallow design minimizes space in cabinet
- Complies with UL 498 section 146 spill test
- Easy push down to pop up function is rated for a minimum of 10,000 cycles (OPEN/CLOSE)
- Permanent installation ready (suitable for MC cable or non-metallic sheath cable)

Dimensions Inches (mm)

- Surface Installation
  - Countertop: 0.09 (2.3)
  - Flush Installation: 0.04 (101.6)
- Lock nut: 0.04 (101.6)
- Spacer: 3.63 (88.1 - 92.2)

Note: Recommended to be fed by a GFCI circuit, up to 20 Amp Service.

Installing the Countertop Receptacle

Before installing the Hubbell Countertop Receptacles.

Note: There are different components that will be used throughout the installation. This includes the housing, base, countertop flange, receptacle cover, locking nut and installation screws.
Quick Installation Setup Guide

STEP 1
Cut a circular hole approximately 3.5" in diameter in the countertop for surface mount installation.
If installing a flush mounted trim, an additional counterbore cut is necessary: .09" deep with a 4" in diameter.

STEP 2
Remove the base from the housing to expose screw terminals.

STEP 3
Feed cable through the lock nut under the countertop, as this will secure the device later.

CAUTION: Before handling the cable, make sure the circuit is OFF.

STEP 4
Fasten the metal jacket to the device base. A fitting will be required (not included).

STEP 5
Strip conductors to the correct length as shown on the device.
Ground the base by bonding the green or bare wire to the grounding screw on the base.
Terminate the green or bare wire to the green screw marked \( \frac{1}{4} \). Terminate the white or gray wire to the white screw marked “WHITE” and black or red wire to the brass screw marked “HOT”.

STEP 6
Reattach the base to the housing and secure with screws.

STEP 7
Insert the device into the countertop opening and hand tighten the lock nut to secure the device in place.

STEP 8
Terminate the device to the power source. Press the cover to pop up the receptacle to use, press again to close.
