

PuraGraft Allograft Particulate

Safe - Both FDA and DFDBA materials are widely used in periodontal therapy and there are no reports of disease transmission during the 30-year history of using freeze-dried bone allografts.

Proven - Certified Laboratory Testing, validated Tissue Cleansing, Sterile Packaging, and a meticulous Quality Assurance & Documentation system that ranks second to none.

Affordable - "The most affordable allograft packaged in a jar"

- Packaged in a convenient screw top jar.
- Stringent screening & testing.
- Irradiated with a low dose of gamma to provide sterility.
