

PuraGraft[®] Pericardium Membrane

A natural human collagen membrane ideal for guided bone regeneration and barrier membrane functions. Excellent mechanical strength coupled with ease of handling makes pericardium the optimal choice for dental bone regeneration.

- Pliable membrane conforms to surgical site, ideal defect adaptability.
- Long-lasting, 4-6 month resorption rate
- Excellent mechanical strength and stability
- Rehydrates quickly

Item #	Description
PG1010	Pericardium 10x10mm
PG1520	Pericardium 15x20mm
PG2030	Pericardium 20x30mm
