

# THE GLYPHOSATE SOLUTION

BIOME MEDIC

Rid your body of toxins and help repair damage caused by  
GMOs and harmful food additives with two capsules per day.

# THE CRISIS

Our gut micro biomes and gut linings are being destroyed by a toxic, cancer-causing herbicide called glyphosate. A widely-used weed killer found in 75% of the foods and 90% of beer and wine, it affects crops with genetically-modified seeds (GMOs) and is also used as a drying agent on other crops, like wheat, oats and barley. The plants then absorb the chemical into their cells, so it cannot be washed off or cooked away.

95% of Americans have this chemical present in their bodies. And in 2017, the State of California declared that glyphosate "causes cancer and birth defects," and added it to the Proposition 65 list.

Our gut is the "second brain" of our bodies and responsible for nutrient absorption, hormone production and immune response.

## SIGNS OF A COMPROMISED GUT MICRO BIOME:

- Poor digestion
- Bloating
- Brain fog
- Fatigue
- Weak immune function
- Joint pain
- Weight gain
- Skin issues

# THE SOLUTION

Biome Medic is an exclusive and proprietary formula made with all-natural ingredients. It has the proven ability to remove glyphosate and support a healthy gut, safely and effectively. With only two capsules per day, you can bring balance to your gut's micro biome.

Certified by the Detox Project as a Gold Standard Glyphosate Detox product, Biome Medic goes beyond non-GMO. It may be the world's first anti-GMO product.

## DESIGNED TO HELP:

- **FLUSH** glyphosate out of the body
- **SUPPORT** the good gut bacteria
- **STRENGTHEN** the gut lining and function
- **PROTECT** the digestive tract from future GMO and glyphosate damage

## CLINICAL TRIAL RESULTS

Studied under a small, randomized, product-controlled IRB-approved protocol, Biome Medic's six-week human pre-clinical trial reported:

- 74% reduction of the herbicide glyphosate
- 75% reduction in the inflammatory biomarker C-reactive protein (CRP)
- 35% increase in gut immune response as measured by reduced food sensitivities.
