

CHARGE Spray

What Is CHARGE Spray?

CHARGE Spray is a sublingual spray that provides instant energy through a watermelon-flavored, fine mist spray.

What's In It?

Green Coffee Bean Extract (Natural Caffeine): Green coffee beans are coffee beans that have not been roasted; therefore, the bean maintains its high amount of chlorogenic acid. This chemical compound naturally supports energy by supporting healthy blood vessels, and lipid and blood glucose metabolism. Studies have also suggested that green coffee bean extract can encourage weight loss.

Beta Alanine: Beta alanine is a non-essential amino acid that helps the body produce carnosine, which encourages lactic acid reduction. Body acidity can affect “time to exhaustion” (TTE). Because beta alanine can assist TTE, it can also help boost energy levels, especially during athletic performance. Studies also show that the amino acid can also help reduce fatigue. Because of this, it is a great source of energy.

Green Tea Extract: Green tea contains beneficial antioxidants and nutrients, including polyphenols and catechin. Epigallocatechin gallate (EGCG), a type of catechin, helps reduce free radicals in the body, protecting cells from damage. Together, polyphenols and EGCG support circulation, and therefore, energy levels. While research has not reached a consensus, it is generally believed that green tea can also boost metabolic rate, therefore assisting with burning fat and weight loss.

Other Ingredients

Purified Water, Erythritol, Natural Watermelon Flavor, Stevia Leaf Extract, Citric Acid (ORMI Listed, Organic compliant), Mirenat®-GA, Glycerine.

Mirenat® -GA is a registered trademark of VEDEQSA, Inc.

Suggested Use

Shake well before use. For increased energy and alertness, spray six (6) times under the tongue or inside of the cheek, hold for 20 seconds and swallow. Use as needed throughout the day.

Why Do We Make It?

Keeping energy levels high and stable throughout the day can be tough. Adults (and even adolescents) consume energy drinks, despite the World Health Organization’s statement, labelling these drinks a danger to public health. Even though energy drinks can contain harmful amounts of sugar, caffeine and chemicals, the

industry expects to earn \$61 billion in sales by 2021. Safer alternatives can still leave consumers with a crash, headaches and other symptoms after use.

We created CHARGE Spray to supply energy and alertness safely and conveniently, without the crashes or dangerous additional ingredients.

Dave Sandoval's Product Pairing Suggestions

Dave suggests pairing CHARGE Spray with:

- Bee Energetic: supports energy, endurance and vitality
- Apothe-Cherry: helps provide deep, energy restoring sleep
- White American Ginseng: can provide calm, stable energy

Allergens

This product is gluten-free and vegan. Although less than an average cup of coffee, this product contains caffeine. This product contains stevia leaf extract.
