

EASE Spray

What is EASE Spray?

EASE Spray is a cinnamon-flavored sublingual spray that is specially designed to naturally relax physical tension and offer muscle and joint support.

What's In It?

Turmacin®: A potent extract from the plant *curcuma longa* (turmeric, in the family of ginger root). Turmacin® is clinically tested, 99% water-soluble, and 1% fat-soluble to maximize rapid assimilation in a safe way. The extract contains bioactive polysaccharides and “tumerosaccharides,” which can support joint support and pain.

The polysaccharides in Turmacin® support PGE2 and IL12 (hormone-like substances) signal inhibition in the body, which are related to joint pain and discomfort. Turmacin® can also support the body's response to inflammation. Although research is limited, turmeric is generally seen as supportive of pain-related symptoms.

Turmacin® is a registered trademark of Natural Remedies™.

Other Ingredients

Other ingredients include: Purified Water, Sorbitol, Stevia Leaf Extract, Citric Acid (OMRI Listed, Organic compliant), Natural Cinnamon Flavor, Mirenat®-GA*, Sunflower Lecithin.

*Mirenat® -GA is a registered trademark of VEDEQSA, Inc.

Suggested Use

Shake well before use. As a dietary supplement, spray six (6) times under the tongue or on the inside of the cheek, hold for 20 seconds and swallow.

Why Do We Make It?

Millions of Americans suffer from pain or chronic pain. Many turn to non-steroidal anti-inflammatory drugs (NSAIDs) to seek relief. In fact, some people use NSAIDs as a daily solution for pain or other discomforting symptoms, which can lead to excessive use or violation of medical recommendation. While NSAIDs can offer temporary relief, they are designed to treat the symptom (not the overall cause) and can cause permanent damage, especially with long-term use. Risks include gastrointestinal bleeding, increased risk of heart attack and stroke, potential skin reactions, cardiovascular disorders and damage to organs like the liver. Addiction is also a potential side effect, especially for those who use NSAIDs daily over an extended period of time.

EASE offers a natural alternative with organic nutrients that do not cause harm. As a sublingual spray, EASE's ingredients are quickly absorbed by the body and can effectively and quickly go to work. EASE is safe to be used daily and as often as needed for those with aches and pains.

Dave Sandoval's Product Pairing Suggestions

Dave suggests pairing EASE Spray with:

- **Joint Flex:** helps rebuild damaged tissue
- **Apothe-Cherry:** supports healthy response to uric acid build-up and inflammation
- **Super Xanthin:** aids in recovery from injuries and supports healthy response to inflammation

Allergens

This product is gluten-free and vegan. This product contains Stevia leaf extract.
