GUITAR**

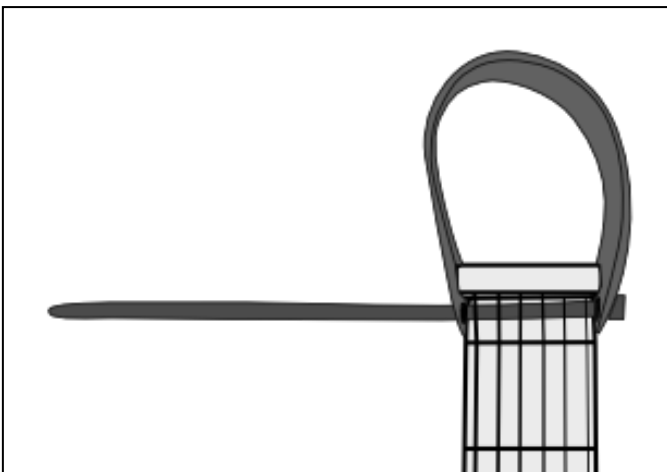

HANGER INSTRUCTIONS

Feed the cable tie through the front right side of the leather Traveler Guitar strap.

With the guitar strings facing up, slide the cable tie under the strings and behind the nut starting from the right side of the neck. Pull the cable tie all the way through until it stops at the cable tie lock.

Feed the cable tie through the left back side of the leather Traveler Guitar strap.

Wrap the cable tie around the back of the neck and pull through the cable tie lock until it is tight. Make sure that the leather Traveler Guitar hanger is snug against both sides of the neck.

Carefully cut the excess cable tie using wire cutters.
