RETAIL

If you are not a business, you can purchase our products from any of our distributors or from our online store.

DELIVERY METHOD AND SCHEDULE

Marko Foam delivers direct in California from our Irvine based factory. Our blanks are available to all other locations via box shipments, pallet shipments, or container loads.

DELIVERY TYPE	METHOD	LOCATION	QUANTITY
Direct	Marko Truck	San Diego to San Francisco	5-300
Box	Common Carrier	Worldwide	4-5 / BOX
Pallet	Freight Truck	Continental US	Approx. 50
Container	Freigh Truck + Ship	Worldwide	400-800

SHIPPING AND RETURNS

SURFBOARD BLANK SHIPPING

If you are out of our trucks delivery route we can easily ship to your location. We can pack up to four surfboard blanks or CNC cuts of any combination into a single box for shipping to your location. If you would like to get a shipping quote please contact us at order@markofoam.com with what you would like to order as well as your shipping address and we will get back to you ASAP. We do recommend using a commercial address if possible as it will save you on shipping fees.

SUP BLANK SHIPPING

If you are out of our trucks delivery route we can easily ship to your location. We up to can fit three surf SUP blanks/cuts or two race SUP or prone paddle blanks/cuts into a single box. If you would like to get a shipping quote please contact us at order@markofoam.com with what you would like to order as well as your shipping address and we will get back to you ASAP. We do recommend using a commercial address if possible as it will save you on shipping fees.

BULK ORDERING (21+ BLANKS UP TO 8' LONG)

If you are looking to order more than five boxes of blanks, 21+ blanks, we can also palletize up to 50 blanks up to 8' in length. This usually makes for cheaper shipping costs per blank. Unfortunately, this option does not apply for CNC cuts at this time. If you would like to get a shipping quote, please contact us at order@markofoam.com with what you would like to order as well as your shipping address and we will get back to you ASAP. We do recommend using a commercial address if possible as it will you save on shipping fees

BOXING/PALLETIZING FEES

Surfboard Blanks/Cuts- \$25.00 covers the box and labor to pack a single box (up blanks/cuts) any additional boxes that are needed will be an additional \$25.00 per box.

SUP Blanks/Cuts-\$50.00 covers the box and labor to pack a single box (up to 3 blanks/cuts) any additional boxes that are needed will be an additional \$50.00 per

BULK ORDER- \$50.00 covers the pallet and labor to load a single pallet (up to 50 blanks) any additional pallets or blanks over 8' in length will have additional boxes and costs.

UPON ARRIVAL OF SHIPMENT...

Someone **MUST** be available to accept your order. If you give permission to shipping company to leave the box without someone to inspect and sign for it, insurance on the shipment is voided. **DO NOT** decline the shipment and/or send as it complicates the claim and voids the insurance as well. **Please inspect the and its contents thoroughly at the time of delivery.** If you find that any part of order is damaged, or if the box itself is damaged, have the driver notate it on the lading and **take pictures of the damaged goods and box.** Contact us as soon as can with pictures at info@markofoam.com and explain the damages and we initiate the claim immediately. Upon receipt of your information we will ship out replacement(s) with no additional shipping charges to the customer. Please hold the packaging and damaged goods for two weeks in case the shipping company to do further inspection. Everything ordered with Marko Foam is insured for the amount.

PAYMENT TERMS

WHOLESALE

Initial orders are either prepayment or C.O.D. All container orders require 50% deposit and final 50% is due prior to shipping. Credit terms are considered only after a client relationship has been established. Once relationship is established client will fill submit credit form. A finance charge of 24% APR is applied to past due balances.

ONLINE

All online orders require full payment up front. We accept all credit and debit cards.

PICK UP

All pick up orders are either prepayment or C.O.D. We accept cash, check or all major credit cards.

GUARANTEE

Marko Foam guarantees the quality of our blanks. If you receive a blank that does not meet our quality standards, we will replace the blank. In addition, if that blank has been shaped, we will credit the customer with a shaping fee (per our schedule) OR an additional blank (to be determined by Marko Foam). In order to be eligible for either credit, the inferior blank must be returned to Marko Foam.

SUSTAINABILITY

At Marko Foam, our recycling and sustainability initiatives are a top priority. At all of our facilities we believe in zero waste. We make sure all scraps and dust from both our facilities are collected, recycled and repurposed back into our products. Not only do we recycle our waste but we are an EPS Industry approved foam collection facility. This allows anyone to drop off their EPS trash to be recycled. All collected foam is collected, grinded, melted down and reused back into our foam product line.

Our Waste to Waves Program in collaboration with Sustainable Surf has been given both national and international recognition. Thanks to our W2W surf shop partners, we are able to collect consumer EPS foam waste from their collection boxes. We take that EPS waste to recycle, process and repurpose the foam into all of our foam products not just surfboards.

MARKETING

Marketing resources (listed below) are available for free to our wholesale customers. Our goal is to educate our customers and surfers a like on our foam technologies, the importance of using quality foam and our current position as the only eco-board approved foam on the market.

"Marko is Album's only source for EPS. Best cell structure, feel & performance hands down and the best crew to work with!"

- Matt Parker, Album Surfboards

"Marko Foam not only makes great EPS, but also provides outstanding customer service and insight that allows me to make a better surfboard."

- Jon Pyzel, Pyzel Surfboards

"I have been using Marko exclusively for EPS for 17 years. Their quality service and dependability on their product is unmatched in this industry."

- David Vernor, Vernor Surfboards

Q & A

Marko Foam Blanks

Location: Huntington Beach, CA-USA

1/ Genesis of the factory

Marko was founded in 1959 by Don Peterson as a family owned & operated foam manufacturing and fabrication facility. Today, Marko has three generations of the Peterson family working, including the Founder Don Peterson.

In 2006 Marko took decades of knowledge molding EPS foam and started a specialized line of EPS surfboard blanks. Marko wanted to prove that EPS is a viable option for building high quality surfboards.

Marko has continued to grow their blank line by working with some of the best board builders in the world including William Stretch "Riedell of Stretch Surfboards and Matt Mayhem" Biolos of Lost Surfboards. This has allowed them to test the limits on what material and construction methods a high-performance surfboard can be built from by being ridden by some of the best surfers in the world.

3/ What is your product line ?

Marko has a full collection of water sport related foam blanks including wake surfs, body boards, surfboards and SUPs.

4/ Benefits of Marko's MOLDED EPS Blanks

Marko prides itself on the quality of their products. Marko uses a proprietary molding technique when making their blanks. This enables them to:

- Have consistent densities throughout their blanks.
- High fusion between beads making for a better finish when shaping and overall stronger board.
- High durability factors means longer board life and better investment over time.
- 100% recyclable material and safer to use for your health.

PREMIUM BLANKS MADE IN USA

2/ EPS / PU?

Marko Foam is an EPS surfboard blank manufacturer that uses unique form molding techniques to ensure the tightest bead fusion, cleanest finish and the best performance possible in a finished surfboard. Meaning the foam is more durable because of tight fusion, safer to shape due to lack of chemicals and better performing because of its balanced densities. EPS foam is known for its recyclable qualities. Marko recycles over 150,000 lbs a year.

5/ How are blanks produced?

Each Marko blank is molded in an aluminum mold that is also manufactured by Marko Foam. They use a proprietary bead type that is pre-expanded to a precise density before it is injected into the mold. Steam is used to build up pressure inside the cavity to fuse the beads together. The molding process and bead type that is used enables Marko to create very tight fusion between the beads making for a smoother finish for shaping and overall stronger board.

6/ About different densities and uses?

The density of a blank can greatly effect the weight and flex of a board. EPS is known for being lighter than PU boards but that is only if you want it to be. If you increase the density of the blank you can match the weight and overall buoyancy of a PU board. With higher densities you also create more crush resistance and increase overall strength so heavier glassjobs are not necessary. Without a heavy glass job, you will create more flex in the board.

7/ About stringers: How to choose the right one?

The type of stringer you use can greatly effect the flex and feel of your board. Softer stringers, such as Cedar are going to flex more. While a harder wood like bamboo will absorb a lot of the vibration that can be felt while riding a wave and stiffen the board which is great for big wave boards.

With new construction methods being developed, new types of stringers such as high density EPS, PU and other composite materials have emerged. These can greatly change the flex pattern of boards depending on what type of glass jobs they are combined with. The testing of these products are still underway but have had promising feedback from those who have tried it.

8/ What's new in your future ? Next product evolution?

We are constantly pushing to make the highest quality blanks possible. We recently launched a new formula for our blanks that has superior fusion between the beads which makes for a better shaping experience and overall stronger board. We also have a new line of blanks that will truly revolutionize the industry and set them apart from other blank companies when released. We are ready as anybody to take on the ever changing landscape of the surfboard building community, the question is not what can we do but what can't we do.

FOAM TYPES

FOAM TYPES

VIRGIN FOAM

The virgin surfboard blank is our staple product that has been in production since day one. This blank is made out of our newest EPS formula. This formula has the ability to be completely recycled.

BENEFITS TO THE VIRGIN FOAM:

Stronger board due to tight fusion between the beads. Cleaner look Easier to shape because the tightly fused beads that do not fall apart.

I-FOAM

I-foam is a highly durable copolymer material that we developed for high-performance water sports as seen in many soft boards and body boards. We brought this high-tech, lively core to the surfing public to enjoy back in the 80's. The I-Foam core has been shaped and tested in all kinds of surfing conditions to ensure the highest quality water sport foam blank is made.

BENEFITS OF I-FOAM:

No water absorption due to its closed cell material that is fused tightly together. Highly durable due to the incredible strength of the epoxy glassing and resiliency of the I-Foam material. High performance due to the memory of the I-Foam allows the rider to rebound and glide into turns easier.
