

ROC-IT® PLATE LOADED

OPTIMAL BIOMECHANICS AND DYNAMIC ADJUSTMENT:

THE ESSENCE OF HOIST'S ROC-IT® LINE

ROC-IT® LINE MACHINES TRANSFORM TO ACCOMMODATE THE MOVEMENT OF THE HUMAN BODY

Dynamic adjustment, designed to provide a more comfortable and secure workout based upon the body's natural posture and flexibility, is the essence behind the ROC-IT® line from HOIST®.

Using $ROX^{\mathbb{M}}$ technology, ROC-IT® products continuously adjust to a user's movements, helping them maintain optimal positioning while allowing for maximum range of motion on these innovative machines.

SUPERIOR BIOMECHANICS COMBINED WITH 'FUN' CREATE AN UNFORGETTABLE EXERCISE EXPERIENCE

Traditional machine-based exercise is 'muscle-centric' with the equipment providing a stable platform for users. But it comes at an expense. Fixed machine designs restrict natural movement, forcing users into unnatural positions that place unnecessary stress on the body and increase the risk of injury.

ROC-IT® products exercise motion mimics the more natural, comfortable and functional movement of free weight training. The 'fun' rocking movement constantly shifts the user's center of gravity to impose small, yet appropriate challenges to the core musculature, while maintaining adequate stability.

ROC-IT® PLATE LOADED

WHY IS THE ROC-IT® LINE A GOOD FIT FOR YOUR CLUB OR FACILITY?

- Ratcheting adjuster system provides quick and easy seat adjustments to accommodate varying user sizes
- Easy step through design speeds up workouts and allows for users to quickly enter/exit the machine
- Head support and oversized handles provides a more comfortable and secure workout for users
- Integrated scuff guards and rubber foot protectors safeguard the machine's frame and the facility floor
- Wide and narrow hand grip positions fit all body types
- Integrated bottle holder and accessory tray keeps personal items organized and reduces clutter on the gym floor

A TRUE INNOVATION IN STRENGTH TRAINING - BUILT FOR EVERYONE!

"Kudos to HOIST® for developing equipment that will help club operators attract all types of individuals to strength training." - Cedric X. Bryant, Ph.D., FACSM, Chief Science Officer - ACE®
