Share your filter usage, and we'll find affordable alternatives,
freeing up your budget for other critical investments

ADVANTEC

MFS, Inc.

Opticlear Mixed Cellulose Esters (MCE) Membrane Filters

- Airborne Asbestos Monitoring
- Sampling and Analysis of Si & Pb
- Sampling of bulk-air for TSP (Total Suspended Particulate Matter)

Glass & Quartz Thimbles

- High temperature extraction or dust monitoring.

Binder-free Glass Microfiber Filters (Grade- GB100IR)

- Filters with very low trace metal content of As, Pb, Cd used in high and low volume air samplers for aerosols, airborne dust and metal contaminants.

Quartz Fiber Filters

- Filter media for air pollution analysis to sample acid gases in stacks and flues at high temperatures $>500^{\circ}\text{C}$

PTFE Composite Filters (PG60)

- Measurement of dust concentration in the air

37mm 2PC/3PC Cassette

- Fungi Collection, Microbiological Analysis & Asbestos Monitoring.
