

A-1 MEDICAL INTEGRATION

**THE PROP
COLLECTIVE**

PLACEBO PILLS PURCHASING

RIGHTS & LIMITATIONS

This agreement is to verify that the purchaser acknowledges the following in order to purchase any of A1 Medical Integration's "placebo pills" via The Prop Collective.

A1 Medical Integration presses and bottles "placebo pills" for the sole purpose of on-camera/stage usage*, in lieu of real pharmaceuticals. These pills are made from the inert binding powders and compounds (excipients) used to press real pills, but omit any active drug ingredient that could cause harm to the user.

These excipients include, but are not limited to:

- Magnesium Stearate
- Microcrystalline Cellulose
- Dicalcium Phosphate
- Silicon Dioxide

**(Specific ingredients lists are included with each pill bottle purchased.)

Safety Data sheets for these ingredients can be found on the product page of our website [here](#). While placebos are often referred to as "sugar pills", our pills contain no sugar.

*In some cases, A1 Medical/The Prop Collective may request script pages in order to confirm legitimacy of pill usage.

By purchasing one or more bottles of A1's "placebo pills" you agree to the following:

- The pills will not be re-sold.
- The pills are not to be used in pharmaceutical trials or independent experimentation.
- The pills must stay under the control of the production to avoid "accidental mix-ups" with real pills.

- The pills should not be used to deceive the end user.
- The buyer must agree to inform the end user that the pills have no active / harmful ingredients prior to ingesting.
