

MultiGest® Enzymes

Digestive Enzymes with Gentian and Fennel AUST L 216328

Up to 38% of Australians may suffer from indigestion¹ at some point in their lives, which could include symptoms such as pain, a feeling of fullness, discomfort, nausea, flatulence and burping.² While these symptoms can be brought on by certain medications, stress, some medical conditions or pregnancy, they can also be a result of eating certain foods.²

MultiGest® Enzymes contains a blend of plant-derived enzymes to assist in the breakdown of carbohydrate, protein, fat, lactose and fibre to help maintain healthy digestive function.

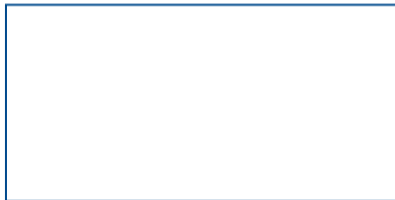

Also containing gentian and fennel, herbs used traditionally in European medicine to relieve digestive disturbances like indigestion, bloating, flatulence and poor appetite, this vegetarian-friendly formula works in a wide range of pH values – meaning it can work even in the highly acidic environment of the stomach.

Suffering from indigestion can be a miserable experience, but digestive support may be just a capsule away with MultiGest® Enzymes!

For more information about assisting digestion with BioCeuticals MultiGest® Enzymes, talk to your healthcare professional.

Always read the label. Use only as directed and if symptoms persist, consult your healthcare practitioner. Vitamin supplements should not replace a balanced diet.
