Warnings

Not for prolonged use. If symptoms persist consult your healthcare practitioner. Not recommended for use by pregnant or lactating women. May harm the liver. Vitamin and mineral supplements should not replace a balanced diet.

- ✓ Gluten Free
- ✓ Lactose Free
- ✓ Vegan
- ✓ Vegetarian

AUST L 275595

Pack Size: 60 tablets

Recommended Dose: Take 2 tablets once or twice daily, or as recommended by your registered healthcare practitioner.

Storage: Store below 30°C in a cool, dry place, away from direct sunlight.

Full disclosure of excipients in every formulation

Each Tablet Contains

Extracts equiv. to Dry:

Piper methysticum root equiv. Kavalactone	2.8g 50mg
Ziziphus jujuba var. spinosa seed	3g
Passiflora incarnata herb top flowering	1.5g
Magnolia officinalis stem bark	1.5g
Melissa officinalis leaf and flowers	750mg
Magnesium amino acid chelate equiv. Magnesium	250mg 50mg
Glycine	100mg

Independent third-party testing at Australia's most respected phytochemical laboratory reports:

'Anxioton exhibits a kavalactone chemotype with a high percentage of kavain and dihydrokavain which is documented to induce a more desirable anxiolytic effect!'

Independent third-party testing results

Technical Information

Contains Herbs that Relieve Nervous Tension, Stress and Mild Anxiety

Stress is a common biological response experienced by people of all backgrounds, demographics and geographical locations. *Piper methysticum* (Kava kava) is a traditional Pacific island plant that has been used for centuries^{1,2} for both ceremonial and medicinal purposes^{3,4}. The highly regarded Kavalactone constituents have been extensively investigated in numerous clinical settings in an attempt to substantiate their long-standing traditional use, and hence provide further knowledge regarding their positive effects on relieving stress and mild anxiety states^{5,6}. Mechanism of action investigations show that the Kavalactone constituents reach many targets that influence CNS activity and have effects on GABAergic, glutamatergic, dopaminergic and serotonergic transmission⁷. Additional valuable herbal medicines that have extensive documentation in the traditional literature for their ability to relieve mild anxiety and nervous tension are *Passiflora incarnata* (Passionflower), *Melissa officinalis* (Lemon balm) and *Magnolia officinalis* (Magnolia)⁸⁻¹⁴.

Kava Assists with Healthy Socialisation

Stress, nervous tension and mild anxiety can affect people in many ways, and can be the result of both internal or external factors. In the quest to reliably document these physiological responses, several laboratory investigations have stimulated the HPA axis, with approaches including simulated social interactions and varied public speaking tasks¹⁵. *Piper methysticum* has a long history of use in Pacific island ceremonies and is reportedly consumed to convey a vast array of benefits, including welcoming important visitors and assisting with healthy socialising and mental states^{1,16}.

Contains Herbs that Assist with Sleeplessness, Supporting a Healthy Restful Sleep

Feeling energised and achieving a good night's sleep is at the heart of good health for many people. With increased demands and life pressures becoming more prevalent in today's society, it is no surprise that a growing number of people are looking for new and innovative ways to achieve these goals. The herbal components Kava kava, Passionflower and Lemon balm have all been extensively documented for their traditional sleep aid properties^{1,3,9,10,12-14,17} and ability to assist with a restful night's sleep. The reported relaxation and sedative properties of these plants provide a good rationale for their inclusion into the Anxioton formulation, with the dosage and extract types carefully selected to support this important process.

Kava is Traditionally Used to Assist with Muscle Relaxation

Traditional texts also report that *Piper methysticum* can be used for muscle relaxation and for the relief of minor muscular tension. Furthermore, Kava is traditionally used in herbal medicine to help relieve mild rheumatic aches and pains.^{3,18}
